

Industrial Safety Readiness Training

Each year, more than 4,000,000 people in the United States suffer a workplace injury or occupational illness.

The Industrial Safety Readiness Training (ISRT) program provides the core concepts of safety awareness for industrial workplace training, and an individualized learning plan that addresses the most common hazardous situations faced in the industrial environment.

The ISRT goal is to contribute to a reduction in workforce injuries and a higher degree of liability control.

Program Overview

- Web-based, HTML training program built for any device
- Delivered through DuPont Sustainable Solutions Learning Management System
- Most courses available in both English and Spanish
- Individualized programs available
- Over 800 courses to choose from

Did you know?

ISRT courses are continually updated with any safety standard modifications, such as the modifying of Occupational Safety and Health Administration's (OSHA) Hazard Communication Standard, to bring it into alignment with the Globally Harmonized System of Classification and Labeling of Chemicals (GHS).

Certificate Overview

Upon successful completion of the ISRT program, individuals can print a certificate of program completion, valid for one year. Several manufacturers require all contractors to verify ISRT completion for entry to facility by showing the wallet size certificate or by accessing the ISRT database.

“Employees are the backbone of any company. Here at SW Funk Industrial Contractors, we believe this from top to bottom. Utilizing the Manufacturing Skills Institute's ISRT program as the foundation of our Safety Training Program allows us to continuously strive towards Goal Zero: zero incidents, zero accidents, and zero injuries, assuring our work family's wellbeing. The SW Funk family is honored to receive the 2020 VMA Gold Safety Award and we look forward to a continued partnership many years into the future.”

“ - ***Ryan Mosher, Safety Coordinator, SW Funk Industrial Contractors*** ”

Industrial Safety Readiness Training

About the Program

The highly adaptable ISRT program helps individuals to:

- Reduce injuries and health problems among coworkers
- Build on knowledge on OSHA regulations
- Learn the fundamentals needed to deal with potential hazards
- Demonstrate competency for working safely in an industrial setting
- Gain knowledge of changing regulations, guidance documents, and regulatory interpretations

Manufacturing/Construction Area Course Outline

(5-8 hours)

- **Asbestos Awareness:** Do Not Disturb
- **Bloodborne Pathogens:** Just the Facts
- **Safety Matters:** Confined Space Entry
- **Safety Matters:** Electrical Safety
- **HazCom:** In Sync with GHS
- **Safety Matters:** Hearing Protection
- **Safety Matters:** Lockout/Tagout
- **Safety Matters:** Personal Protective Equipment
- **Safety Matters:** Slips, Trips & Falls

Non-Manufacturing Area Course Outline

(3-5 hours)

- **Bloodborne Pathogens:** Just the Facts
- **HazCom:** In Sync with GHS
- **Safety Matters:** Portable Fire Extinguishers
- **Safety Matters:** Personal Protective Equipment
- **Stairways and Ladders:** A Safe Step

Injuries are always unexpected, but by using simple and proven concepts, employees and contractors can learn to recognize at-risk conditions or behavior before they lead to an injury.
