MORNING- PROJECT G.R.A.N.T. MARCH 2020

[Grant Park Conservancy](http://www.gpconservancy.org) | <http://www.gpconservancy.org>

Please join the Grant Park Conservancy in our mission to care for historic Grant Park
- we depend on volunteers like you to help keep the park healthy and beautiful!

Project G.R.A.N.T. (Greenspace Restoration and Neighborhood Teamwork) convenes monthly in the park for morning (9am- 12pm) and afternoon (1:30pm-4:30pm) work sessions. Both sessions will tackle labor-intensive projects throughout the park including invasive plant removal, tree canopy care, trash pick up and more. Volunteers are welcome to sign up for one or both sessions, and these work days are great for small groups or those in need of community service hours.

Our meetup location is often at the Milledge Fountain, at the intersection of Cherokee and Milledge Avenues (use 600 Cherokee Avenue, 30312 for mapping purposes), but may change. We will alert you in advance of any meet-up location changes.

A few details:

- Physical activity - such as bending, lifting, dragging, and digging - is required.
- Projects happen rain or shine, so please check the weather and be prepared. Projects are only cancelled in the event of severe rain, thunderstorms and lightning.
- The Conservancy will provide all necessary tools and gloves.

- Volunteers should wear sturdy, closed-toed shoes or boots, and clothes that can get dirty - long pants and sleeves are highly recommended! You WILL get dirty, so please don't wear your favorite white pants or your best sneakers.
- Be sure to bring sunscreen, bug spray as needed, and drinking water in a reusable container. No single-use plastic bottles if possible, please. The GPC does not provide water or snacks, so please plan accordingly.
- If you are joining us for the afternoon session only, please note potential parking challenges
