

Date: October 30 - November 1, 2019 | Venue: Jamaica Conference Centre

Why Attend?

This year's **BIZTECH** is designed to provide senior leaders and IT professionals across industries with insights, tools and resources to manage challenges and take advantage of the opportunities that are part of the Digital Era.

Recognizing that there are varying needs across industries, the conference will focus on specific industries and their value chain relevant for all.

Come listen to speakers share, participate in workshops and interact with fellow peers on their experience of their transformation journey

Come to **BIZTECH 2019**. Cultivate the expertise you need to build your business.

- 3 days of expert sessions for your every interest
- Valuable networking opportunities by industry, product, or business role
- One-on-One access to speakers and experts
- Hands-on training workshops and technical courses
- Professional certification credits for the sessions you attend

Who attends?

Join over 300 participants, product suppliers and everyone in between who is eager to learn more about the next level of business

- CEOs, CIOs, CFOs, COOs, CNOs
- Controllers and financial directors
- IT/IS directors and technical managers
- Business analysts and system analysts
- Programmers
- System or network administrators
- Database specialists
- SMB companies
- Enterprise organizations
- All Job Functions participating in innovation

Industries:

AgriTech
HealthTech
FinTech
GovTech
ManuTech
RetailTech and More

#BIZTECH2019

Day 1

Topics	Speaker	Track
IT Resilience: Foundation for Digital Transformation and Business Resilience (Presentation)	David Allen	FinTech
Colouring within the lines: An investigation into the practical application of RegTech within the Jamaican financial and regulatory framework- (Presentation)	Loya Haughton	RegTech
Innovation with Business Intelligence- (Presentation)	Nigel Sammy	FinTech
FarmCredibly (Presentation)	Varun Baker	AgriTech
Enterprise Cloud on HCI, the core enabler for Digital Transformation (Presentation)	Gustavo Sosa	FinTech
Hospital Software Implementation in the Jamaican Context	Matthew Budram	HealthTech
OptiPres: A Distributed Mobile Agent Decision Support System for Optimal Drug Prescription (Presentation)	Dr. Kevin Miller	HealthTech
Data Mining (W)	Rasheed Andrews	FinTech
Innovation in Stroke Patient Care	Prof. Felix O. Akinladajo	HealthTech
Digital Transformation through Innovation	Nadeen Matthews-Blair	FinTech
Intcomex/Microsoft Workshop 1	Hector Negron	FinTech
NCB Workshop	NCB

#BIZTECH2019

Day 2

Topics	Speaker	Track
The Art and Science of Data Storytelling (Workshop)	<i>Raquel Seville</i>	FinTech
Design Sprints for Rapid Innovation- Jamaica Case Studies	<i>David Bain</i>	GovTech
Improving Connectivity between Government and the Insurance Industry (Presentation)	<i>Donovan Morgan</i>	GovTech
Business Intelligence for Small and Medium Enterprises (Presentation)	<i>Dr. Gunjan Mansingh</i>	RetailTech
Enabling meaningful Connectivity	<i>Daniel Dawes</i>	GovTech
Robotics Process Automation (RPA)-Making Business More Efficient (Robots not included) (Presentation)	<i>Dwayne Russell</i>	ManuTech
Winning Cloud Strategies or Next Generation Hybrid Cloud Power next Generation Business (P)	<i>IBM</i>	ManuTech/ RetailTech
Can FinTech keep pace with Privacy and Security	<i>Andrew Nooks</i>	FinTech / Privacy & Security
Data Protection Compliance for Employers	<i>M. Georgia Gibson-Henlin</i>	RegTech
Fighting Cyber Security Crimes with AI	<i>Karl Chambers</i>	Privacy & Security
Privacy in The Digital Age (P)	<i>Anthony Smith</i>	GovTech
Intcomex/Microsoft Workshop 2	<i>Microsoft</i>	Hector Negron

Some Of Our Speakers

The Art and Science of Data Storytelling: The New Language for Intelligent Enterprises

The ability to tell powerful stories is already a sought after skill for many professionals. Communication is ranked as the #1 soft skill on LinkedIn and storytelling is a crucial component of that. This hands-on workshop will help you to:

- Craft compelling data stories
- Build the skills to make your stories stand out
- Cut Requirements Gathering Time

Whether you are a BI manager, analyst, developer, business user or data enthusiast, this workshop is for you. By learning to use our proven visual storytelling template, you can reduce your requirement gathering time by up to 50% whilst also experiencing a boost in user engagement and ownership.

RAQUEL SEVILLE
CEO
BI Brainz Caribbean Limited

BI Brainz
The Leader in Enterprise Visual Storytelling

Date: **October 30 - November 1**

IT Resilience:
Foundation for Digital Transformation
and Business Resilience

Businesses need to be available to their customers 24/7/365. Business resilience is no longer a matter of recovery but rather, continuous operations. An enterprise must ensure access to business critical applications without any IT interruption, downtime or delay. This creates new governance, risk and compliance (GRC) issues. By embracing IT Resilience from the start, organisations can create a robust, flexible and secure platform as they engage in more complex digital transformation opportunities. Join David as he explains why the traditional methods for backup and recovery are no longer adequate in this new "always on" digital world, and why IT Resilience is a central element for digital transformation.

DAVID ALLEN
Founder & Chief Executive Officer

Colouring Within The Lines:

An investigation into the practical applications of RegTech within the Jamaican financial and regulatory landscapes

This study will examine existing and future use cases for RegTech in the Jamaican Financial and Regulatory landscapes and the impact of the technology on organisations' day to day processes. This will be done by identifying the most pivotal developments and contributions in RegTech and matching them to the current needs of the aforementioned sectors. In doing so, the importance of RegTech to the development of Financial Technology will be emphasized.

The results of this body of research provides practical opportunities for players in the compliance and financial sector to be ahead of the next crisis. Palpably, this research will become invaluable to many key stakeholders within the local Financial Sector.

#BIZTECH2019

Innovation with Business Intelligence

Nigel Peter Sammy is a Microsoft Data Platform Most Valuable Professional (MVP) with over seventeen (17) years of technical experience with various technologies which includes over fourteen (14) years of data platform experience. He currently works at SoftwareONE as a Data Platform Team Lead and used to be a Lecturer at the School of Business and Computer Science (SBCS) with a focus on the Microsoft Certified Solutions Associate (MCSA); SQL Server certification as well as other BSc courses for the University of London and University of Greenwich.

Business intelligence (BI) is the process of analyzing data and presenting information to help people make informed decisions. BI is usually considered to improve revenue but there are many other benefits for BI for both public and private sector organizations. This session will explain how to leverage BI to increase profits, reduce operation expense and improve processes within the business.

#BIZTECH2019

OptiPres:
 A Distributed Mobile Agent
 Decision Support System for
 Optimal Drug Prescription

Prescribing the right drugs for a patient is a difficult task that takes into consideration several factors. The Institute of Medicine (IOM), U.S.A., has reported based on two major studies (1999-2001 & 2006) that prescribing the wrong medication is a big problem, and the effects can sometimes be fatal. To address this problem, a distributed intelligent mobile agent-based system by the name, OptiPres, was designed and implemented. This system will be used by doctors on their smart phones while prescribing medicines. It will assist them in making more informed decisions by either choosing the optimal solution from processing a repository of past decisions or by presenting a set of possible drugs and using criteria specified by them to identify the optimal drug. The evaluation of OptiPres was done by comparing its recommended outcome of three predefined medical scenarios against the recommendations from a group of doctors and the World Health Organization (WHO) manual entitled: 'Guide to Good Prescribing'. The results indicate that OptiPres is effective in prescribing optimal drugs and in reducing the cognitive burden on doctors, especially in subjective decision making contexts where they have to consider multiple parameters.

KEVIN MILLER
 Lecturer in the
 Department of Computing

Industry Specialization: The Key to Effecting Change at Scale

Tech companies, software developers and IT practitioners can combine in-depth knowledge of niche industries e.g. insurance, with their expertise in tech to streamline government processes. Such innovation can help to decrease processing times, decrease fraud and increase revenue for the government which will benefit all Jamaicans.

In this presentation, I'll review how my company has specialized in and partnered with a specific industry to revolutionize data exchange with the government: for the benefit of all. Insight will also be provided into how other tech professionals can specialize in an industry and innovative to cause change at scale.

Enterprise Cloud on HCI the core enabler for Digital Transformation

It's no secret that businesses have to constantly change to keep pace with the future. Learn how they are modernising their strategy, meeting challenges and using Enterprise Cloud to reach their transformation goals. Join Gustavo for an in-depth discussion on why so many companies worldwide are transitioning from traditional 3 Tier architecture to an Enterprise Cloud, and why Hyperconverged Infrastructure (HCI) is the future of the Modern Data Centre.
