Re: Glenview Road Bridge Over I-94 North Sidewalk Replacement

Dear Resident:

We are pleased to inform you that improvements to the north sidewalk on the Glenview Road Bridge over I-94 are scheduled to begin the week of September 30. Work involves removal of the existing sidewalk and parapet wall on the north side of the bridge, construction of a new 8-foot wide sidewalk and parapet wall with fencing, and placement of new bridge deck pavement markings. This project is expected to be complete in early December 2019.

Glenview Road will remain open to traffic during construction by shifting traffic to the south side of the bridge. Certain construction operations will require temporary lane closures on the Edens Expressway to protect the motoring public during demolition of the existing sidewalk. Since Edens lanes closures are only allowed during overnight hours, there will be several days in which evening work will occur.

The General Contractor for this project is Lorig Construction Company of Des Plaines, IL. Darren Frawley of BLA, Inc, will be the Village's representative providing daily oversight of the project during construction. If you have any questions, please do not hesitate to contact me at (847) 853-7601 or [mihalopoulosg@wilmette.com](mailto:mihalopoulosg@wilmette.com) or Darren at (630) 660-6180 or [dfrawley@bla-inc.com](mailto:dfrawley@bla-inc.com).

We appreciate your patience and cooperation as the Village completes this project.

Sincerely,

Georgia Mihalopoulos, P.E.  
Engineering Technician
