

BATTERY HORIZONS

Powering the Future of Mobility

Lead Battery Technology Expert

Nathan Orth | Clarios

Senior Category Manager

PRESENTATION OVERVIEW:

Nathan Orth will discuss AGM and EFB proliferation, with a high-level overview of emerging technologies within the transportation sector. Additional touchpoints to be covered include the future of the 12V battery in the wake of widespread EV adoption.

BACKGROUND:

A graduate of Carroll University, with a Delta Associates Black Belt Business Insights Level 1 Certification, Nathan has over 14 years of experience as a Category Analyst and Manager with the automotive industry. He is responsible for tracking and analyzing the U.S. battery aftermarket across automotive, heavy duty, and marine segments. Nathan believes it isn't just enough to review the numbers, but seeks to understand how consumer, demographic, economic, and technological trends continue to converge to drive market conditions today and into the future.
