

BATTERY HORIZONS

Powering the Future of Mobility

Lead Battery Technology Expert

Dwayne Shumate | AAA National Office

Automotive Technical Engineer

PRESENTATION OVERVIEW:

Dwayne Shumate will discuss the vision of the AAA National Office on the future of AAA-approved battery manufacturers. He'll provide a closer look at what AAA's battery quality testing protocols entail and what AAA Engineering is trying to accomplish regarding the quality of AAA branded 12V batteries going forward.

BACKGROUND:

Dwayne has worked in the automotive industry for 38 years. He joined the AAA National Office in 2010 as an Automotive Technical Engineer, where he assesses the impact of evolving automotive technology on AAA Members and Service Providers. In addition, he conducts independent testing and evaluations, along with preparing position papers to support AAA Clubs and Members.

Prior to his time with AAA, Dwayne served as Principal at EcoGreen Energy Solutions, where he conducted comprehensive studies on renewable energy applications. He also worked in the Automotive Aftermarket division of Delphi Technologies, managing a team of engineering technicians. There, he conducted vehicle testing and database construction and developed unique approaches to vehicle electrical and electronics diagnostic applications.

Dwayne received his MBA from Northwood University's DeVos Graduate School.
