

HEALTH AND SAFETY

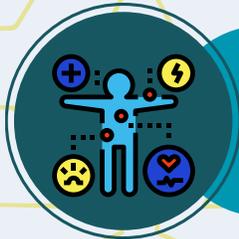

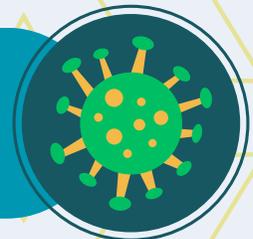

Our Team is committed to providing quality, safe, and timely services to your family. Your family should expect to receive a visit reminder prior to all scheduled visits by your Primary Service Provider (PSP).

PLEASE NOTIFY YOUR PSP AHEAD OF TIME IF...

You, your child, or others in your household has had a fever within the last 48 hours.

You, your child, or someone else in your household has been diagnosed with a contagious illness in the last 5 days.

You, your child or someone else in your household has new onset of symptoms known to be related to a contagious illness in the last 5 days.

If there is a weather emergency in your area or if there are any conditions that could keep your PSP from being able to get you your home safely

Due to the nature of early intervention service locations being provided in natural everyday places, your service providers travel to multiple locations per day. It is important for us to confirm your scheduled visits and complete broad health status check prior to ensure your and your PSP's safety.

If the provider does not receive a response to their contact attempts within 1 hour of your scheduled visit time, your visit will be canceled.
