

# Demolition Permit Reimbursement Program

CFD2 is looking for residential properties that are to be demolished to use for training purposes. We will reimburse owners for the demolition permit under qualifying circumstances.

## Which Properties Qualify?

Certain conditions must apply in order for us to utilize a property for training:

- Property must be located within the CFD2 service area.
- There must be at least one or two days between the completion of asbestos abatement and beginning of demolition.
- Each property will be evaluated by CFD2 personnel to determine whether it can be effectively utilized for training purposes.

## How does it work?

If the property being demolished meets the requirements listed, the owner may qualify for reimbursement of the demolition permit. A meeting and site visit with a CFD2 representative is required to determine final eligibility.

Please contact CFD2 Training Chief Mike Morgan to discuss the property and determine whether it qualifies.
