

Peter Cobabe
Founder, Adaptr

Peter Cobabe is a visionary technologist, systems thinker and speaker on the frontier of conscious innovation. As the founder of Adaptr AI, Peter is dedicated to transforming how we relate to work itself, guiding the shift from “Time equals Money” to “Time equals Creativity and Art.”

With a multidisciplinary background in artificial intelligence, organizational theory, cognitive psychology and systems thinking, Peter has consistently catalyzed transformative growth and innovation across industries. His frameworks and implementations have helped clients generate tens of millions in enterprise value through efficiency gains, strategic clarity and human-centered design.

Peter’s passion for technology began early, teaching computer classes before school and running a successful computer repair and web development business as a teenager. That same drive for exploration has led him to speak at MIT, collaborate with Esalen Institute and mentor visionary leaders seeking to integrate technology with consciousness.

Through Adaptr AI, Peter continues to empower pioneers, founders, and organizations to evolve with intelligence and integrity - using AI as a force for creativity, coherence and collective evolution.
