

### **CHARITABLE FORMULARY REMINDERS:**

The **Primary Access Medication List** represents medication most consistently available over time in the Dispensary of Hope inventory to treat common primary care conditions. This list allows dispensing sites to order medication with assurance that the same medication will have the highest probability of being available on a recurring basis.

The **Flexible Access Medication List** represents medication in a variable supply to address a wide range of primary care conditions. This list allows dispensing sites to fill gaps in their charitable inventory to serve more patients by extending charity care resources. **Check our inventory first** when ordering before purchasing medication for charitable uses.
