Economy

Federal Funds Rate

Federal funds rate expectations

FOMC and market expectations for the federal funds rate

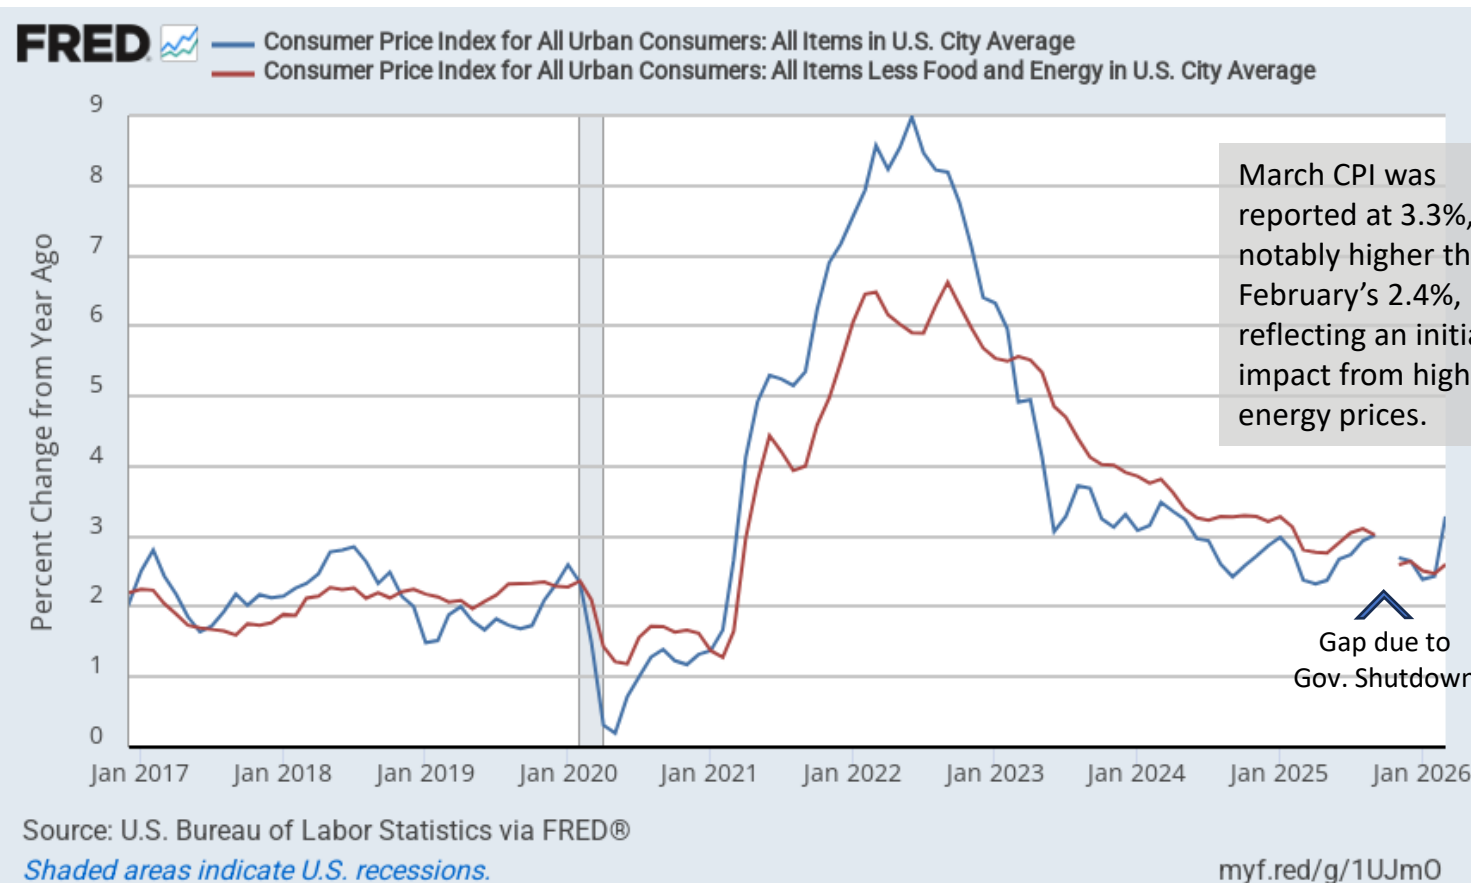

Inflation risks have elevated due to increased crude oil prices. And, as such, expectations for Fed Funds rate cut(s) within 2026 have been curtailed.

Source: Bloomberg, FactSet, Federal Reserve, J.P. Morgan Asset Management. Market expectations are based off of USD Overnight Index Swaps. *Long-run projections are the rates of growth, unemployment and inflation to which a policymaker expects the economy to converge over the next five to six years in absence of further shocks and under appropriate monetary policy. Forecasts, projections and other forward-looking statements are based upon current beliefs and expectations. They are for illustrative purposes only and serve as an indication of what may occur. Given the inherent uncertainties and risks associated with forecasts, projections or other forward-looking statements, actual events, results or performance may differ materially from those reflected or contemplated. Guide to the Markets – U.S. Data are as of March 31, 2026.

Real GDP Estimate – Atlanta Fed GDPNow

Evolution of Atlanta Fed GDPNow real GDP estimate for 2026: Q1
Quarterly percent change (SAAR)

As we've previously conveyed, very little color is offered regarding the Atlanta Fed GDPNow estimate, which is based on a mathematical model. We can surmise that the recent steady downward revisions for the Q1 estimate is attributable to the late quarter impact of higher energy prices.

Sources: Blue Chip Economic Indicators and Blue Chip Financial Forecasts

Note: The top (bottom) 10 average forecast is an average of the highest (lowest) 10 forecasts in the Blue Chip survey.

Equities

S&P 500 Annual Returns & Intra-Year Declines

S&P 500 intra-year declines vs. calendar year returns

Despite average intra-year drops of 14.2%, annual returns were positive in 35 of 46 years

We've heard some leading Wall Street strategists suggest that the intra-year "lows are in" for this year. Sounds great... but we wonder if a quick restoration of Middle East oil supplies may be necessary.

Source: FactSet, Standard & Poor's, J.P. Morgan Asset Management. Returns are based on price index only and do not include dividends. Intra-year drops refers to the largest peak-to-trough decline during the year. Returns shown are calendar year returns from 1980 to 2025, over which the average annual return was 10.7%. Past performance is no guarantee of future results. Guide to the Markets - U.S. Data are as of March 31, 2026.

Equities

S&P 500 Forward P/E Valuation History

S&P 500 forward P/E valuations have pulled-back recently from levels which have historically proven to be unsustainable. We view this as constructive for the prospects of U.S. equities in the intermediate-term.

The Equities chart on this page will rotate through the year based on perceived relevance.

Source: Bloomberg, FactSet, Moody's, Refinitiv Datastream, Robert Shiller, Standard & Poor's, J.P. Morgan Asset Management. Forward P/E ratio is the most recent S&P 500 index price divided by consensus analyst estimates for earnings in the next 12 months, provided by IBES since March 1994 and FactSet since January 2022. Shiller's P/E uses trailing 10-years of inflation-adjusted earnings as reported by companies. Dividend yield is calculated as consensus estimates of dividends in the next 12 months, provided by FactSet, divided by the most recent S&P 500 index price. EY minus Baa yield is the forward earnings yield (the inverse of the forward P/E ratio) minus the Bloomberg U.S. corporate Baa yield since December 2008 and interpolated using the Moody's Baa seasoned corporate bond yield for values beforehand. *Guide to the Markets - U.S.* Data are as of March 31, 2026.

IMPORTANT DISCLOSURES (Continued)

Reference to market index information is included for illustrative purposes only, as it is not possible to directly invest in an index. Indexes are unmanaged, hypothetical vehicles that serve as market indicators. Index total return performance data reflects the assumptions of the reinvestment of interest and dividends but does not include the deduction of fees or transaction costs which otherwise reduce performance of an actual portfolio. The blended indexes are shown for informational purposes only and are not representative of any particular investment or plan.

Acronym Definition(s):

FOMC – Federal Open Market Committee, which is responsible for determining the U.S. monetary policy. The Committee is comprised of 12 members, including the 7 members of the Federal Reserve Board of Governors.

Index Definitions:

NASDAQ 100 – Index of 100 largest growth-oriented non-financial companies listed on the Nasdaq Stock Market.

S&P 500 – Compilation of 500 major U.S. stocks meeting certain criteria; market capitalization and float-weighted.

S&P 400 – Index measuring the performance of 400 mid-sized U.S. stocks; market capitalization and float-weighted.

S&P 600 – Index measuring 600 small-cap U.S. stocks that meet certain criteria regarding liquidity and financial viability; market capitalization and float-weighted.

MSCI All Country World – Global equity index across market capitalizations with about 2,800 constituents, representing about 85% of the free float-adjusted market capitalization across 23 developed and 27 emerging markets.

SCI All Country World ex USA – Global equity index across market capitalizations, which excludes the U.S., with about 2,300 constituents which represents free float-adjusted market capitalization across 22 developed and 27 emerging markets.

MSCI Europe, Asia & Far East (EAFE) – International equity index across market capitalizations, which excludes North America, with about 840 constituents which represents free float-adjusted market capitalization across 21 developed markets.

MSCI Emerging Markets (EM) – International equity index across market capitalizations with about 1,400 constituents which represents free float-adjusted market capitalization across 27 emerging markets.

QUARTERLY MARKET GUIDE: Q2 2026

IMPORTANT DISCLOSURES (Continued)

Index Definitions: *(Continued)*

Bloomberg U.S. Aggregate Bond – Widely followed bond benchmark comprised of investment grade, U.S. dollar denominated, fixed rate taxable bonds including Treasuries, government-related, corporate, mortgage-backed, and agency.

S&P National AMT-Free Municipal Bond – Broad market-value weighted index comprised of larger and more liquid tax-exempt investment-grade U.S. municipal bonds.

S&P Municipal High Yield Bond – U.S. index of municipal bonds that are either not rated or rated below investment grade.

Bloomberg U.S. Corporate High Yield Bond – Index of fixed rate U.S. dollar denominated corporate bonds rated BB+ or below by Fitch and S&P.

Past Performance is no guarantee of future performance.
