An Introduction to Hedge Funds

Are you interested in learning about the past, present and future of hedge funds? Then please join us at Montclair State University on Monday, April 6, 2015 for the HFA Student Symposium: An Introduction to Hedge Funds. Tenured experts will share their experiences working in the alternative investment industry, and provide an overview of the various investment strategies used by some of the top hedge fund managers. In addition to an expert panel discussion attendees will also enjoy an insightful keynote speech by Svetlana Lee, the Founder and CIO of Varna Capital, a value-focused, equity long-short fund that seeks to exploit event-driven situations, structural market dislocations and identify hidden fundamental business value. Ms. Lee founded Varna in 2010 and previously held positions at prominent hedge fund firms Citadel, Greenlight Capital, The Baupost Group and Perry Capital.

This event is complimentary and open to Montclair State students, HFA members, managers, investors and select members of the media. Space is limited, please select the button below and RSVP now:
