

Reduce Costs in a Big Way

May 2017

Affordable and reliable IT that can be easily managed and grow to meet future requirements, however, businesses have other issues beyond the budget that makes change difficult.

- Growth in infrastructure has increased management complexity.
- Older IT assets often cannot meet the performance demands of new applications. Servers older than 4 years deliver only 4% of the performance of current servers. (Source: Intel Planning Guide of 12/13, “Modernize the Midsize Business IT Infrastructure, Four Steps to Better Performance and Lower Costs”).
- High availability requirements add major costs and increase complexity.
