AN 'INTRO TO THE MAIN ROAD' MAP RALLY

This rally is to be run in accordance with the 1982 RRR'S as amended by these instructions (however, all necessary information is contained in these instructions).

Following the course:

Priority list: At each intersection the course you are to follow is determined by the first priority below that applies:

1. Execute a numbered route instruction that directs a unique course, if it does not direct the same course as number 2 below.
2. Follow the Main Road.

At each intersection the Main Road is determined by applying the following list of determinants in order (beginning with A). The first one that directs a unique course is the Main Road.

- A. ONTO The main road is the road that the execution of the course directing action of the instruction has directed the contestant to travel upon by use of the term ONTO and the designation. The designated road is the main road at each intersection where ONTO is applicable until a course directing action is executed. The terms Right, Left, Turn and Straight are course directing actions; execution of those terms MUST result in following a course other than the Main Road.
- B. CURVE ARROWS The main road is the road leaving an intersection as determined by official highway black on yellow curve arrow sign(s) -- black on green here
- C. PROTECTION The main road is that single road leaving the intersection and having no stop sign or yield sign at the intersection.
- D. RIGHT AT T The main road is the road that goes to the right at a T.
- E. STRAIGHT AS POSSIBLE (SAP) The main road is the road that appears to go as directly ahead as possible through an intersection.

Conventions: Both paved and unpaved roads exist. Numbered streets (such as 11TH) and numbered county roads (such as COUNTY 11) will be referenced by their numbers only (11 in both cases).
