CONFERENCE SPEAKERS

Brady Housden

Operations Manager, Healthcare Facilities, OSHU

Brady has been involved in commercial construction and facility management for 25 years. For the last 16 years with healthcare organizations in Indiana and Oregon. He started his career in healthcare facilities as a plant operations mechanic, and moved into project management, with a focus on life safety compliance, for the last 4 years he has been in a management role.

Currently, he works for Oregon Health & Science University, Oregon's only academic medical center. He manages almost 4M sq ft, of hospital, clinic, and medical office spaces, across 28 buildings, that range in age from 101 years old, to 2 years old. Brady currently serves on the board of OSHE and is involved nationally, with the American Society for Healthcare Engineering, working on supporting the industry. He is the recipient of the 2022 Regional Leader award for ASHE region 10.

Brian Dieker

Director-Engineering Operations and Clinical Engineering, Salem Health

Director over Engineering Operations and Clinical Engineering at Salem Health. Brian has worked for Salem Health for 7 years in various roles starting as a project consultant, moving to manager of construction, later taking on management of engineering operations and then to current director position. Prior to working for Salem Health, Brian worked for Turner Construction building healthcare projects for Salem Health and other healthcare systems across the northwest.
