

GENERAL MEMBERSHIP MEETING

The Hall Crown Technique: Restoring Primary Teeth without Local Anesthesia or Preparation (2.0 CE's)

Tuesday,
Sept 12, 2023

The Faculty Club
UC Berkeley, Minor Ln
Berkeley, CA 94720

5:30PM - 8:30PM

FREE for
BDS Members

This course will review the published evidence, indications and technique for placing a stainless steel crown on a primary molar without local anesthesia or tooth preparation; known as the Hall Crown Technique. This course will also explain the rationale and procedure for using resin modified glass ionomer to place esthetic crowns on primary anterior teeth without local anesthesia or preparation; a modified minimally invasive hall crown technique. Case examples of both restorations will be reviewed.

Participants will learn to:

- Understand the evidence and indications for use of the hall crown technique on posterior and anterior carious primary teeth
- Become familiar with the steps and procedure for placing a stainless steel crown on primary posterior teeth using the hall crown technique
- Become familiar with the steps and procedures for placing a resin modified glass ionomer crown on primary anterior teeth using a modified hall technique.

Dr. Jean Calvo

Pediatric Dentist
UCSF Benioff Children's Hospitals

Jean Marie Calvo provides dental care to children and adolescents, with the goals of improving their oral health and making dental visits fun. She is devoted to increasing access to dental care for all children and is particularly passionate about providing care to underserved children, such as those with complex medical conditions or other special health care needs. This is also a subject of her research.

Calvo earned her doctor of dental surgery degree at the UCSF School of Dentistry, where she also completed her specialty training in pediatric dentistry. She has a master of public health degree, with a focus on social determinants of health, from the Harvard T.H. Chan School of Public Health.
