

# GENERAL MEMBERSHIP MEETING

## How To Take a Dental Photograph with any Camera (2.0 CE's)

Tuesday,  
Oct. 10, 2023

**The Faculty Club**  
UC Berkeley, Minor Ln  
Berkeley, CA 94720

5:30PM - 8:30PM

**FREE** for  
BDS Members

Dental photography is no longer confined to taking photographs with "only" a dSLR/mirrorless camera or purchasing accessories like flash modifiers. From simple images to portraits, there are many options available to dental practitioner these days.

### Participants will learn to:

- Navigate taking dental photographs with what is available/readily accessible in the dental office. Whether it is a smartphone (not flip phone), intraoral camera, or even your current office camera, a solid photograph can happen!

**Nathan Yang, DDS**

Nathan K. Yang, DDS, Inc.

Dr Nathan Yang is a graduate of the Arthur A Dugoni School Of Dentistry Class of 2006, where he later taught pre-clinical fixed prosthodontics from 2007-2018. He owns a private practice with his wife in San Francisco since 2008. Dr. Yang is currently the Dental Director at North East Medical Services; a federally qualified health center. Over the last few years, he has spoken on dental photography at various regional and national conferences. Dr. Yang has two children 12 and 10. For fun, he collects sneakers, Pokémon cards and is always looking for the "new thing" at Costco
