

FROM THE EDUCATION DEPARTMENT

The Education plan for 2024 has been completed with the completion of the last two courses, Boat Handling and Marine Electronics. These two courses are both six sessions of two hours each; several people completed each.

.

The 2025 year will start with some changes in the leadership. After several years as a very successful Assistant Education Officer, Brad Loeschler will be moving on to a new leadership role in the organization. After having a very successful run as the ABC Coordinator, Don Becker will be turning to a new leadership role as well. Mark Stone will be taking over as the Assistant Education Officer and the ABC Coordinator. All the best for success to Brad, Don, and Mark in their new roles!

The 2025 Education Calendar will be starting off with courses in February. The details of the calendar are being finalized and will be posted on ABCHH.org in the next couple weeks. Please look at the course and seminar descriptions on our website to see what would be most beneficial to you for increasing your safety and enjoyment on the water.

Wish you all a happy holiday season and a prosperous new year. We look forward to seeing you in classes and on the water soon!

Rick Sturges, AP-CN
Education Officer

Mark Stone, AP
Assistant Education Officer
