

Larry Schulweis

I grew up in Rockland County, NY and now spend most of my time in Bluffton, South Carolina. **My wife and I really enjoy boating here and exploring the waterways**, visiting Harbor Town and many other great spots. I'm still learning the local waters and look forward to expanding my knowledge even more. We have a Monterey 35 foot cruiser with inboard outboards. {IO} The boat is in Windmill Harbor on Hilton Head.

I've been involved in boating since my teenage years. My father had boats when I was growing up, and many years later I found myself returning to the water and picking up the passion again. We kept a boat in Haverstraw, New York, where we spent many great years cruising up and down the Hudson River and exploring the Long Island Sound.

I enjoy doing much of my own maintenance—changing oil, replacing impellers, changing fluids, troubleshooting issues, and handling the day-to-day mechanical needs that come with boating.

I've always had a strong mechanical understanding of how things work, and I enjoy helping others with their boats when I can.

My background is in the audio-video industry. I owned and operated a retail AV business for about 40 years, starting with **car audio**, which eventually expanded into **DirecTV installations, home theater systems, and full home and business networking and conference rooms.**

Most of all, I'm excited to join the boating club to meet new people, discover new destinations, and enjoy all the fun and community that come with being part of this group.

Thank you and I look forward to being involved.

Larry
