

## YouTube Video Transcription Summary Page

### Title of Video:

[FIRES "WORLDWIDE" - SPACE BASED WEAPONS PG&E - Solaren Corp - Russian Patent and More.](#)

### Radio host:

Dr. Bill Deagle (aka "Dr. Bill"), Nutrimedical Report Show, [Nutrimedical.com](#)  
[YouTube Channel](#)

### Guest Interviewed:

Deborah Tavares:, [StopTheCrime.net](#)  
[YouTubeChannel](#)

### Date of Interview:

January 14, 2019

### Upload Date of Video

January 15, 2019

### Duration of Video:

40 min, 19 sec.

### Description:

Dr. Bill Deagle interviews Deborah Tavares:- <http://www.StopTheCrime.net>  
Solaren Corp. and PG&E Space Orbit - Solar Power Microwave To Earth DANGERS!  
PG&E (Rothschild) Bankruptcy  
Collaboration with California Government, the DOD, USA, Inc. and more  
Deadly Corrupt Terra-Cide Killing EARTH!  
Human Population Displacement by Directed Energy Weapons  
Extreme Weather Fires Geotechnic Catastrophes  
Dr Bill Deagle MD AAEM ACAM A4M, NutriMedical Report Show – Nutrimedical.com  
<https://en.wikipedia.org/wiki/Solaren>

Dr. Bill:	Welcome back to the Neutraceutical Report. We have Deborah Tavares the amazing inevitable news bloodhound to find the most awful documents on the world. The thing is, if you don't want to believe her just read. So Deborah, you've got something so shocking people better have their tray tables in the upright locked position their seat belt on news wise. You've got something even more shocking than the last shocking news you did last week, what is it?
Tavares:	I do Dr. Bill thank you again, this is Deborah Tavares with <a href="http://www.stopthecrime.net">http://www.stopthecrime.net</a> . Please sign up for our YouTubes and for our email blasts. This is a topic today that I'm just breaking now, it's a developing story but it hinges back to the email exchange that I broadcasted back in 2015 that became the YouTube about the plan to burn up Northern California. Now, I'm going to back into this because it's important everyone understand what's happening right now with PG&E (PG&E) and as of today on January 14th of 2019. PG&E gave notice of bankruptcy and filed a notice and they have 15 days of advance notice.
Dr. Bill:	Are you kidding me? Bankruptcy?
Tavares:	<p>Wait a minute Dr. Bill, this is a reorganization of the company but this is not what's behind what is happening and I'm getting into this now. This is why this is so important because we have found information and we believe we understand why PG&amp;E has admitted to the responsibility of the fires, except for the Tub fire here in Santa Rosa, CA based on vegetation mismanagement.</p> <p>Rothschild doesn't admit to anything unless there's an end goal and that's what we're going to talk about today. This is extremely important so please follow me with this.</p> <p>Okay, so back in 2015 when I aired the email exchange from PG&amp;E to the California Public Utility Commission I didn't fully understand the entire</p>

	<p>aspect of what they were saying and now I do. So I'm going to read you just a paragraph out of that email exchange that was dated back in August 22 of 2011, and it was from Brian Cherry from PG&amp;E and he said:</p>
<p>Quote of Brian Cherry, PG&amp;E on August 22, 2011</p>	<p>"We are the first to propose a solar generator in space that will beam RF waves down to a receptor site and convert it to DC current. We have changed our receptor site from the Mojave Desert in California to Sebastopol which is in Nevada City".</p>
<p>Tavares:</p>	<p>Sebastopol is an unincorporated community and it was named during the Crimean War as Sebastopol in the Russian Empire. So what we then found out was the corporation that PG&amp;E signed up to and with in 2009. We found out in 2009 that PG&amp;E contracted with a company in Manhattan Beach in Southern California called Solaren. They create a directed-energy satellite to provide California with power and both weather.</p> <p>Now there are several patents that discuss what Solaren does and we're going to go over that now and then we're going to go over how we know the current CEO of USA Inc. is in full awareness of this. We're also going to go over the facts.</p>
<p>Dr. Bill:</p>	<p>Otherwise known as the, yeah let me keep. . . otherwise known as that I just want to say POTUS. Okay, that yeah, please continue.</p>
<p>Tavares:</p>	<p>Okay, so what I also want to say before I get into more of a discussion about Solaren is I have certainly been talking to everybody about the Climate Action Plan and, <i>ad nauseam</i> actually, and as I view and basically and again, this is a developing story, but I'm noticing that all the Climate Action Plans typically are dated around the time that PG&amp;E contracted with Solaren Corp. <b>This is important to note because this is who Solaren this is what they do, they hold several patents for transmitting microwave directed energy from space to pinpoint</b></p>

	<p><b>locations on earth aka sink of the fires okay?</b> Under <b>U.S. Patent No. U.S. 7612284B2</b> is to "a solar-powered satellite will generate a powerful microwave radiofrequency beam focused on an array of collector antennas where it can be transformed to electrical power supplied to PG&amp;E. Also under <b>U.S. Patent No. US 20110204159-A1</b> "a solar-powered satellite will generate a powerful microwave radio frequency beam to control the weather by heating deployments of aluminum oxide and other conductive particles sprayed from aircraft."</p>
<p>Dr. Bill:</p>	<p>Right, by the way let me insert this for you because this is important. I took care of the Aurora fleet, please. We were doing this in mid-1990s and they were putting nanoparticle thorium strontium barium and aluminum. Please continue.</p>
<p>Tavares:</p>	<p>They talk about how the patent describes methods of steering and changing the intensity of hurricanes and more. I didn't understand when I first read that email exchange and I first found Solaren but now I'm understanding more and I'm going to read to you a little bit more of what I snick discovered.</p> <p>Again, when I started the show I said I'm noticing that the Climate Action Plans were primarily adopted around the time the PG&amp;E had hatched a global plan to utilize space-based solar power throughout the world. Then all of a sudden these Climate Action Plans were served up to all of our cities and all of our communities. The cities were getting grant money to sign up on these plans. These plans have some commonalities, they all talk about local heating of the environment, intensity of fires, intensity of power outages because of increased heat events.</p> <p><b>Now we know what Solaren is doing and has created and been behind the directed-energy weapon in California which is also</b></p>

	<p><b>working with PG&amp;E.</b> It's important to know that Solaren talks about the technology that they would convert the power generated into microwave radio frequency transmissions. The microwaves would be beamed back down to an antenna in Fresno, California and then converted into electricity and fed into PG&amp;E's power grid. Mirrors would focus sunlight on solar cells generating electric power.</p> <p>The electricity would be converted into microwaves suitable for transmitting through the Earth's atmosphere at frequencies from 2.45 or or 5.8 gigahertz, as a comparison of 2.45 gigahertz is the same frequency as your kitchen microwave Wi-Fi or Bluetooth.</p>
Dr. Bill:	To know the reason why it is that frequency? Well, it's important to understand this is the frequency that massively maximally absorbs energy in water so, in other words, you're going to heat up free upper atmosphere or people which are 70% plus of water it naturally transfers energy to the water in every living thing. Please continue.
Tavares:	<p><b>So now we're going to talk about the connection between the current President, Donald Trump, Solaren and understand how they are working with the Russians.</b> When we get back from this break I think that you will be stunned <b>and the collusion with Russia is real based on what you're going to hear me discuss next.</b></p>
Dr. Bill:	So, in other words, Mueller's investigation's not over, the collusion is not trying to just get elected it's much more than that right with technology.
Tavares:	Absolutely.
Dr. Bill:	Back in a moment.
Dr. Bill:	I pulled up what you told me to look at Solaren and you told me to search and it looks like it goes back to 2009 and now the latest of May 23, 2018,

	Solaren and PG&E I'd like you to expand on this.
Tavares:	Okay, so now prior to the break I was developing the story around the fact that PG&E is creating a new modality around their business and this is they had to use directed energy weapons to create the illusion that the current system of electricity delivery is no longer viable. Now they're considering and will likely and who knows but it looks like they may declare bankruptcy. And if they do of course then many of their creditors are paid off but then all of the victims likely will lose out everyone during all the fires.
Dr. Bill:	Including anybody has been injured by the fires.
Tavares:	Absolutely, so now let's look at what I was getting ready to talk about.
Dr. Bill:	In other words, they probably did a test on this system actually that may have triggered fires from Solaren.
Tavares:	<p>So let's talk about what occurred on August 2, 2017. Solaren supports the reestablished National Space Council. President Donald Trump's recent executive order re-established the National Space Council. The National Space Council will coordinate U.S. space policy across all US government departments and agencies. A user's advisory group will provide outside advice to the council with an emphasis that the interests of industries and other non-federal entities involved in space activities, including in particular commercial entities, are adequately represented in the council.</p> <p>Vice President Mike Pence will serve as Chairman of the National Space Council. Solaren Corp. supports the President's efforts to strengthen our nation's space program with the growing impact of commercial space. The Users Advisory Council will ensure that the interests of new and innovative commercial space businesses, such as space solar that</p>

	<p>requires the support of multiple federal agencies, will be represented on the Council said Solaren's President Gary Spirnak.</p> <p>We're going to talk about Spirnak in a minute now as I said Solaren is headquartered in Manhattan Beach in California. They say they are an energy and aerospace company that is principally engaged in research design development integration and operations of space solar plants and the sale of clean base load space solar electricity. They talk about how they have patented space solar plants and will generate zero emissions electricity from space that is cost competitive with the terrestrial resource of base load electricity.</p> <p>In the coming decade Solaren Space Solar Power development program will validate all aspects of Space Solar Productivity (SSP) plants that space solar productivity worldwide. Now let's look at. . . we have one thing that's important about Russia.</p>
<p>Dr. Bill:</p>	<p>Now I have to add that I have that this first book it's important for you to know this they already I know this from 25 years ago they were inserting the thorium partners nanoparticle thorium, strontium, barium, aluminum to turn the upper atmosphere into a plasma for the space weapon systems that we've developed in their space at a U.S. base command.</p> <p>Putting a powerful line of energy through this plasma will disturb weather systems on the whole freaking planet, it's going to be unbelievable! Plus you can figure out few tectonic events and earthquakes and volcanoes and all kinds of stuff like tsunamis and super storms. This is going to be very doing right here is going to be very dangerous!</p>
<p>Tavares:</p>	<p><b>I just read about the alignment with the Trump Administration and that disclosure on August 2, 2017 and how Solaren is coordinating with the National Space Council.</b> Now I'm looking at a release of</p>

	August 12, 2016 and it says this:
Quote: National Space Council Release, August 12, 2016	<p><b>"Russia announces issuance of space solar power system patents to Solaren corporation August 12 of 2016. The Russian Federation Federal service for intellectual property has announced the issuance of a key space solar power system patent to Solaren Corporation with the issuance of the Russian patent on July of 2016.</b></p> <p>Solaren now has key enabling space solar power system patents in all of the world's major space faring countries. The Solaren inventors are Dr. James E. Rogers and Gary Spirnak who is one of the officials or CEOs of Solaren. Solaren patented space solar power plants will generate zero emissions electricity from space."</p>
Tavares:	Again, that is they say the most competitive with any terrestrial or source of base load electricity. <b>Ok so now we're working with Russia.</b>
Dr. Bill:	Including by the way solar power from your own home which is what people should have. Because now once you have a system controlled by the government they can shut it down and kill everybody.
Tavares:	<p>Well that's of course the plan. Now let's talk about who the founder is and how the <b>California Public Utility Commission has been working with Solaren from the beginning.</b> I will tell you over the years, we're talking about back in 2009, 2010, we went to the California Public Utility Commission on many occasions to talk and to plead with them to not deploy the smart meters on everybody and the President of the CPUC at that time was Michael Peevey.</p> <p>We're going to talk about Michael Peevey because this is what happened to him when he left the California Public Utility Commission and this is absolutely what is happening in California. The California Public Utility</p>

	<p>Commission is Rothschild. All the utilities are Rothschild. <b>This is a global take down using the guise of solar based energy for all of us but what is really space-based weapons to direct energy systems and burn us up.</b></p> <p>This is all part of the Wildlands Project and more. This is all part of the rollout of all of the Climate Action Plans. I'm going to talk about Michael Peevey right now. So Michael Peevey was appointed to the Solaren Board of Advisors and this is an announcement that was made December 12, 2017. Solaren Corporation announced that Michael Peevey has been appointed to the Solaren Board of Advisors effective immediately. The Solaren President. . . I hear the music. On the other side, this is critical.</p>
Dr. Bill:	When we come back I want you to continue on the other side.
Tavares:	This is critical, and again I'm going to be tying this back to what I found in the Berkeley Climate Action Plan you will be astounded.
Dr. Bill:	Yeah, I'm glad I'm sitting down. You're right, this is more than I even expected by a large margin. Oh my gosh, you have lots more to talk about. Please continue.
Tavares:	<p>Well I absolutely do as we continue to discuss why PG&amp;E is going bankrupt because of all of the fires that were started by the use of space-based weapons through <b>Solaren, a Manhattan Beach based corporation that is working with Russia and the White House on space-based weapons.</b> So we're going to now talk about who Michael Peevey was during the time that I was going to the California Public Utility Commission and where he went when he was no longer the President of the California Public Utility Commission. So back in December 12th of 2017 Solaren Corporation announced that Michael Peevey had been appointed to the Solaren Board of Advisors effective</p>

	immediately. The Solaren President CEO Gary T Spirnak said:
Quote: Solaren Corporation announcement Michael Peevey appointed to Solaren Board of Advisors, December 12, 2017.	<p>"Michael Peevey brings a wealth of knowledge to Solaren and vast experience as a former corporate officer at a fortune 500 company an entrepreneur and key governmental energy regulator in California. I'm going to repeat that, a key government energy regulator in California microscopical musical chairs right this giant TV has worked all facets of California energy Peevey was the former president of the Southern California Edison company he co-founded new energy ventures an energy supply and service company that was later sold. Michael Peevey was the former president of California's most powerful energy regulatory agency the California Public Utility Commission or the CPUC. As CPUC President Peevey was the key energy adviser to several California governor's, aka this is why we got the smart meters this was a rollout of control of energy to literally deploy space-based weapons on us, but let's continue.</p> <p>Peevey has also been a force in enabling new sources of power and Solaren looks forward to his sage advice as Solaren develops, builds, launches and operates the world's first commercial space solar power plant said the CEO Gary Spirnak."</p>
Tavares:	Now let's move on to Solaren's CEO Gary Spirnak. Who is he?
Quote: Solaren's CEO, Gary Spirnak's background.	"Gary Spirnak has over 33 years of aerospace experience in both industry and government. He is the founder and CEO of Solaren Corporation, the first commercially viable space solar company. He has formed an impressive program team, guided Solaren through multiple investment rounds and led the design and development of Solaren breakthrough in space solar power plants. He has co-authored several key Solaren base solar power system patents which I was reading to you earlier.

	<p>Prior to founding Solaren, Mr. Spirnak held a number of key positions in government and industry. At Boeing Satellite Systems he was the director of new satellite applications. He also has extensive experience in space system development operations and financing. At Hughes Aircraft Mr. Spirnak managed a major national security space program development to include successful multi-million dollar R&amp;D efforts. Mr. Spirnak's responsibilities and encompassed formation of the program team strategic plan and management of cost schedule and performance requirements. He had a distinguished military career and was a US Air Force officer and spacecraft project engineer at Cape Canaveral Air Force Florida. He successfully led a large spacecraft launch processing team of government and contractor personnel for a multibillion-dollar Department of Defense satellite that flew on the Space Shuttle. In addition, Mr. Spirnak supported the Department of Defense and NASA space shuttle launches as well as the US Air Force Delta and Titan launch operations in both technical and management roles. Mr. Spirnak is a senior member of the AIAA.</p> <p>He is a native Pennsylvanian and received his BS in industrial engineering at Pennsylvania State University and MS in mechanical and aerospace engineering at the University of Delaware."</p>
Tavares:	And I could go on. . .[interrupted]
Dr. Bill:	I see he probably has also got high-level clearance and US space command, missile defense demand and very classified departments within the government they're dealing with space technology so this guy is not just an average fella is he?
Tavares:	Well <b>he's orchestrating a system of genocide on all of us and directing energy weapons on us and has been starting fires</b> so I'm going to go and read something that I just discovered in the Climate

	<p>Action Plan out of Berkeley, California, and again, I'm noticing that these Climate Action Plans by in large seem to have been adopted during the time that PG&amp;E was creating this deal to launch a space-based electric grid from solar in space. So the Berkeley Climate Action Plan in Berkeley, California was adopted June of 2009 and I found this and I found this to be very very interesting. They talk about:</p>
<p>Quote: Referencing Senate Bill 107 related to Berkeley Climate Action Plan adopted in Berkeley California June, 2009.</p>	<p>"Senate bill 107 obligates the investor-owned utilities, which is PG&amp;E to create the share of renewable energy resources wind, solar and geothermal. The law is intended to decrease California's reliance on fossil fuels and again we know our fuel never came from fossils but let's go on reduce the reliance on fossil fuels and reduce greenhouse gas emissions from the electricity sector. A cleaner greener electricity grid is a key component of achieving state and local greenhouse gas reduction targets. The City of Berkeley supports the Governor's call. Given the seriousness and threat of sea level rise and the other consequences of California's water supply and coastal resources and the impact it will have on the state's economy, population and natural resources, directing state agencies to enhance the state's management of climate impacts from sea level rise, increased temperatures, shifting precipitation and extreme weather events, PG&amp;E has been urged to achieve a standard of 100% renewable energy."</p>
<p>Tavaras:</p>	<p><b>So what we are seeing is a complete transition from the type of delivery of electricity we have been getting to a space-based solar powered energy.</b> And that is what we are seeing and, again, I want to read this as well. Now just last week the newly enshrined Newsome new Governor of California has announced a water tax hike, and this is in the new budget that's proposed and he is quoted by saying that this is his first state budget during a news conference that was January 10th of 2019 and he says:</p>

Quote: Governor Newsom of California first state budget news conference, January 10, 2019	"In order to help disadvantaged communities obtain safe and affordable drinking water, California Governor Gavin Newsom is proposing a new statewide water tax. In the newly released 2019-2020 budget, Newsom calls for the creation of a safe and affordable drinking water fund that would enable the state water resources.
Dr. Bill:	And Gavin Newsom is totally bought and paid for is he?
Tavares:	Absolutely as they all are.
Dr. Bill:	Wow even worse than our previous Governor Brown.
Tavares:	Well I don't know, I think he's just picked up the same seat same gavel same laws of a franchise.
Tavares:	I wanted to pick it up with where I left off prior to the break and I was getting ready to talk about the Urban Water Management Plan and how all of this is associated. Not only with resource control and reduction but resource elimination. So I'm going to read out of a Water Resource Management Plan right now and this is scary. . . scary!
Quote: Urban Water Resource Management Plan	"The plan shall provide an urban water shortage contingency analysis that includes each of the following element that are within the authority of the urban water supplier, [Deborah: In other words, all of our local urban water suppliers that are of course under the mandate of the state]. So number one, stages of action to be undertaken by the urban water supplier in response to water supply shortages, including up to a 50% reduction in water supply in an outline of specific water supply conditions that are applicable to each stage. Actions to be undertaken by the urban water supplier to prepare for and implement during <b>[Deborah: listen to this carefully] a catastrophic interruption of water supplies including but not limited to a regional power outage and earthquake</b>

	<b>or other disaster.</b>
Tavares:	<b>Solaren and the space-based weapons system is going to eliminate access to water in municipal water supplies most likely.</b> Now I'm going to read this. . .
Quote: Urban Water Resource Management Plan	"Northern California based PG&E received worse news back in the middle of 2017 when the California Public Utility Commission fined PG&E \$8.3 million for fault for failing to maintain a gray pine tree that connected with a power line and ignited a fire. The September 2015 fire burned 110 square miles destroyed 549 homes, killed two people and caused about \$3 million in insured losses. Listen to this because this is what we have now researched with the contractual agreements of nationwide tree cutting teams. Here's what they say. .[interrupted]
Dr. Bill:	They've known this for several years they had. . . yeah please continue.
Tavares:	Hold on Dr. Bill, let me finish here. They say:
Quote: PG&E Contractual agreements of nationwide tree cutting teams.	"Tree contact with power lines is a leading cause of power outages and has caused several past regional blackouts, including the August 2003 blackout that affected 50 million people in the Northeast US and parts of Canada. This and the PG&E incident show that inadequate vegetation management can cause even more devastating conditions".
Tavares:	<b>So now what is being set up for grid outages throughout the country is lack of vegetation management, make no mistake about this. We are being transitioned from the typical electric model that our utilities have presented us.</b> Now keep in mind PG&E is 106 years in business and they don't go out like this without a plan and the plan is spaced based weapons system of energy. And again back in that early time when I was talking about that email exchange between PG&E and the California Public Utility Commission, <b>I did not understand the</b>

	<b>connection between Solaren, the United States, Russia and the demise of our current electrical grid.</b>
Dr. Bill:	Who are the Russian scientists or technicians or politicians involved like which the name of the scientists it has the original patent that was given to PG&E?
Tavares:	Well, I'm not prepared to say that right now Dr. Bill and . . . [interrupted]
Dr. Bill:	I bet you're researching and you'll have that soon I'm sure, please continue.
Tavares:	So it's very very important to understand this is a setup this is how many many communities are going to be wiped out off the map. We have the burn up list on stop the crime net from CalFire you can just type in for yourself "CalFire.ca.gov and it's the <a href="#">Wildland Hazard and Building Codes</a> . And yes, the cities for which Cal Fire has made recommendations on very high fire hazard severity zones and there are lists and the list includes many of the areas that have already been hit with directed-energy weapons from the space-based satellite. Certainly we know that the pulse of frequencies from the smart grid has been involved as well. <b>This is a takedown this is a worldwide transition of how we have been supplied with electricity in the past for global control</b> and what. . .[interrupted]
Dr. Bill:	And by the way, they don't even want people to have their own solar power or propane or natural gas or some other local production of power. They want top-down control by these big agencies and governments.
Tavares:	<b>Absolutely this is this is a lockdown and they go on to say that the Solaren solar space operations is the plant operations group is responsible for the operation and maintenance of the solar space program plant to include solar power satellite and ground receive</b>

	<p><b>station as well as electricity delivery and scheduling for utility. . .</b>  [interrupted]</p>
Dr. Bill:	<p>And by the way, it is under the watch of this maniac [Trump] in the White House who allowed on January 2017, the 5G Network everywhere which by the way is dangerous and authorized recycling water including hydrogen sulfide water in Northern California and elsewhere they're coming out of the ground and triggering off earthquakes and so on in places where they put in frack water into the water ground to pull off the thermal water for thermal energy. They tried a project here in Oregon they tried to project just last year and almost trigger it off major earthquake near Fort Hood in Oregon where basically that volcano almost caused major earthquake in Portland.</p>
Tavares:	<p>Well, the eruption from the controlled Rothschild Puna geothermal plant on the Big Island in Hawaii and of course as many of you know we toured the world's largest geyser geothermal operation right here in Northern California. You can look it up on stop the crime and go on the tour with us. But understand <b>we are being transformed and transitioned out that is what we're seeing now because we're being burned up burned out, demised out created transhumanism agenda the whole the whole gamut we're watching the whole thing unfold on our watch right now.</b></p>
Dr. Bill:	<p>Right, exactly yeah well amazing isn't it?</p>
Tavares:	<p>Yeah, so what do you think of that?</p>
Dr. Bill:	<p>Pretty awful I know all the space stuff I know how freaking dangerous is that they were background astrophysics with plans to expand. I know that this is something they shouldn't freakin put high energy pulses up.</p>
Tavares:	<p>Can you get this up on YouTube, can you send this to me right now?</p>

Dr. Bill:	Well not this minute after the show yeah we can we can convert this that we can convert this with some pictures with Adobe Premiere Pro into a video put it up on YouTube.
Tavares:	Well you can do that or I can have my person do that so. . . because I really want to get this up and I need you to do it.
Dr. Bill:	Just basically drop the audio file in and then do that or should I have. . . you're busy yeah we'll go ahead and do it if you want to do if you think you can do it faster I mean I'm pretty out of it I'm doing I'm tacked up as they say
Tavares:	You are teched up okay, how about I call you what time do I call you and... [interrupted]
Dr. Bill:	By the way, I'm an expert on advanced stellar geotectonic that was called radionics frequencies effect on the quantum universe so you know one of the top people in the world in this area and <b>what's really dangerous is what they're playing with is literally the geobiology of the planet earth.</b> See the earth is a living thing the living thing system you don't puncture giant surges of energy through the upper atmosphere and not think it's going to affect weather systems, earthquakes or volcanoes or cause all kinds of extreme weather this is craziness!  Totally experimental, haven't they probably known what it's going to do now to use these energy beams that they can trigger our fires but by <b>itself it's going to trigger off major weather catastrophes and geotectonic events all over the world.</b>
Tavares:	Well that's exactly what the plan is, an eliminated coastline moving us out of air that we can breathe you know the. . .[interrupted]
Dr. Bill:	The term I thought up a few weeks ago I call it Terra-cide because our planet Earth is often called Terra that sounds like terror because they're

	trying to destroy Earth.
Tavares:	Terra-cide! What do you think?
Dr. Bill:	Well I think we're in trouble, we're beyond trouble, way beyond trouble.
