

Good afternoon Mr. Chrysostome,

Just recently we had an internal meeting to evaluate our progress and achievements with regards to minority and small business participation within our clients and projects and of course The School District of Palm Beach County came up as part of our conversation.

First of all I wanted to thank you and your team on behalf of LEGO Construction for being a key factor in helping LEGO Construction succeed together with our SBE and M/WBE partners in all our projects with the District.

Together LEGO Construction has been able to help several SBE and M/WBE grow their businesses and train their staff in all aspects of construction and project management processes, including safety and quality control.

Thanks to the help of your team from the Office of Diversity in Business Practices we have been able to support and help develop the following SBE and M/WBE businesses: I.Q. Constructions, Origins Consulting, Sleiman Construction, Cami-Axle Construction and Con-Build.

Please let us know how we can further help the Office of Diversity in Business Practices in promoting and encouraging other small and minority businesses to participate in this successful program.

Thank you once again for granting us the opportunity to work with the School District of Palm Beach County,

**Miguel Guerrero** | Vice President Preconstruction
