Observing the methodology of existing management, she believed she could improve the company. Taking over the company in 1997, Danise put her principles of honesty and integrity at the forefront of FMCC. These core values combined with the objectives of delivering quality workmanship and prioritizing customer and employee needs have enabled FMCC to grow into the well-respected company it is today.

Florida Metro is honored to be a dual certified SBE/MWBE vendor with the School District of Palm Beach County since 2014. During the past eight years they have worked hard to be a dependable contractor to the School District, helping the transportation fueling facilities maintain environmental compliance and continuously fuel school vehicles. We are definitely a behind the scenes contractor; providing facility support often when it is needed the most. Our highly experienced and dedicated service team works with the School District most frequently, under the leadership of our Vice President and Service Manager, Heather Green. While her formal education is in Special Education, she has worked in the petroleum industry since she was a teenager, gaining most of her work experience in petroleum service and construction. Heather is a state certified pollutant storage systems contractor and holds certifications from several industry-related manufacturers.

Florida Metro Construction is continuously striving to be better than we were yesterday. We learn from every mistake, every achievement, every finished project; applying each lesson learned in order to provide our customers with a quality product, service, and experience.
