

# PIWI Learning Institute

Do You Have  
Unanswered Questions  
About PIWI?

Are You Wondering How  
Functional Assessment  
Relates to PIWI?

The DPH EI Training Center (EITC) and UMass Boston are offering a **4-day**  
**training institute for PIWI Champions, and Supervisors.**

The institute will provide an overview of the *Parents Interacting With Infants (PIWI)* model, the “why” behind PIWI, strategies for successful implementation, and opportunities to problem-solve challenging situations. Institute learning objectives include:

- Applying the use of dyadic and triadic strategies to support parent/child interactions and progress towards achieving IFSP outcomes
- Differentiate how each discipline in EI can support and promote the PIWI philosophy using their individual experiences
- Demonstrative how functional assessment supports the PIWI philosophy in Massachusetts EI home visits.

Dates are 9/10, 10/22, 11/19, and 12/10. The location will be centrally planned based on who registers to attend. Programs can send up to two staff and staff must attend all four dates. To register please visit [www.eitrainingcenter.org](http://www.eitrainingcenter.org). Please contact Emily Webb with any additional questions.
