

NCSEAM Family Survey Information

Dear Families,

The NCSEAM Family Survey, also known as the EI Family Survey, is distributed in March and October each year. The Survey is used to gather information about the Outcomes families experience as the result of their participation in Early Intervention (EI). Families are asked to fill out **one Survey** each year. In the past, the Survey has been hand delivered to families by Service Coordinators. Because EI providers were not in families' homes in October 2020, no Surveys were given out.

As of March 2021, the Family Survey is available online. If your child has been enrolled in Early Intervention (EI) for at least six months, you may have been eligible to share your feedback by completing a Survey. If you were eligible, your EI program will give you a one-time user code to log on and complete the Survey. Please fill it out and hit **Send** when you have finished.

Your answers help the Department of Public Health and your EI program improve services for your family and for other families as well.

Want to know more about **Family Outcomes**? What they are, how they are measured and used? If so, click on the link below. It will take you to the Early Intervention Parent Leadership Project website where you can find this information.

Thank you for providing your valuable feedback!
