**THE STONE AGE INSTITUTE
& INDIANA UNIVERSITY'S CRAFT RESEARCH CENTER**

PRESENT THEIR 2017 CRAFTSMANSHIP LECTURE

**“Bloomington’s First Car: 1897
(and the reason why Bloomington’s second car wasn’t like it)”**

Carl Cook and Ronan Young

Cook Medical, Bloomington, Indiana

12:00 noon, Tuesday, November 14, 2017

Whittenberger Auditorium

Indiana Memorial Union

900 E. 7th Street

Indiana University, Bloomington, Indiana

Carl Cook and Ronan Young have “reverse engineered” Bloomington’s first car, the Howe Automobile, originally built in 1897, that used a horse buggy frame combined with a one-cylinder internal combustion engine. After extensive historical and technological research, they have succeeded in building a “working” full-scale replica of this car from scratch, machining their own parts and even pouring molten iron and casting other components. Please join us for this journey back in time!

This event is free, and all interested are welcome.
