

# FSMA Produce Safety Rule and Packing Containers

The FSMA Produce Safety Rule States that only new, single-use or cleaned reusable containers should be used to pack produce

Packing containers made from porous materials, like wood pulp, should be clean, free of visible filth before packing and used once

Reusable containers should be made of non-porous materials that can be cleaned, with soap, and sanitized when needed

Clean liners made from plastic or paper can be used with packing containers made from porous materials.

Make sure all containers are in good condition and discontinue using any reusable containers with cracks or breaks
