Highlighted Courses

BIM Education Program

4 Units | May 9 - May 20

Monday - Friday, 5 - 8 PM ET

Members: \$1,450 | Non-Members: \$2,000

AGC's **Building Information Modeling Education Program** 3rd Edition is designed to educate construction professionals at all experience levels in BIM concepts and processes. The highly interactive virtual program provides 32-hours of instruction via Zoom, preparing construction industry professionals at all levels to take advantage of the benefits of BIM.

Lean Construction Education Program

7 Units | May 19 - June 16

Thursdays, 10 AM - 6 PM ET

Members: \$2,450 | Non-Members: \$3,425

Lean Construction is driven to minimize costs and maximize value on each project completed, challenging all stakeholders to develop and apply better ways to manage the overall construction process. To develop the tools needed to build lean, AGC has developed the **Lean Construction Education Program**. Construction professionals at all experience levels will learn the building blocks necessary to transform their projects and companies into a lean operating system.

Project Manager Development Program

5 Units | June 13 - June 17

Monday - Friday, 10 AM - 6 PM ET

Members: \$1,695 | Non-Members: \$2,375

The **Project Manager Development Program (PMDP)** curriculum, along with the activities and shared experiences of course participants, provides the necessary skills and knowledge to increase the participant's ability to work successfully with others to ensure project success. The 40-hour, five-unit program covers the basics of project management and provides tactics and strategies for ensuring project success. This is the perfect course for new or aspiring project managers.

Construction Supervision Fundamentals

9 Units | June 27 - June 29

Monday - Wednesday, 10 AM - 6 PM ET

Members: \$795 | Non-Members: \$1,115

AGC's Construction Supervisions Fundamentals is the first step in the path to invest in and retain your team by developing your own supervisors. The course is designed for aspiring front line leaders who are looking to learn the entry-level management skills to lead construction activities. This interactive course allows the building trades and craft workers to experience construction supervision techniques first-hand and create a professional development plan to achieve personal career goals.
