

## Covid-19 – how we can help

- The EPS Partnership can support small businesses affected by the economic disruption caused by the effort to control the spread of the Coronavirus by:
  - helping the business to quantify how their revenues are likely to be affected and over what time period
  - identifying what actions can be taken to mitigate the adverse impact
  - identifying which elements of the government's support package might be applicable and estimating the scale and likely timing of any support
  - creating a realistic cash-flow plan with which to seek support to gain more immediate access to funds.
- There is no charge for this service during April and May 2020. Availability is subject to capacity and therefore assistance is offered on a first-come first-served basis.
