After-Hours Golf Information

With the golf pro shops closing earlier during the summer months, **homeowners are still welcome to use the golf courses after hours.**

Rangers will continue patrolling both courses during these times.

All golfers must be able to present a valid Homeowners Card or Phase II Guest Pass while on the course.

Golfers **without** proper identification **will be asked to leave** the property.

Rangers will also collect applicable green fees from any golfer who does not have a valid Annual Pass.

If you **plan to rent a golf cart for after-hours play**, please contact the appropriate golf course before the golf shop closes that day so arrangements can be made to reserve and prepare a cart for your use.

COTTONWOOD PALO VERDE GOLF NEWSLETTER

Turf Talk–Golf Course Maintenance

Tuesday (CW) / Wednesday (PV) closures:
The Tuesday-Wednesday closures at PV and CW are very beneficial. This year they began on June 2,3. Summertime is one of the busiest times of the year (outside Overseeding) for golf course maintenance. It is the time of year when all the work is done to prepare for October Overseeding and winter ryegrass. During the days of closures, the team is working 10hr days. On the closure days, the team does not do any work to prepare areas for play... Greens are not being cut unless work is being done, hole locations are not changed, and bunkers are not prepared unless work is being done.

Projects, such as, vertical mowing, topdressing of greens, large aeration events for the fairways & tees, and other projects can be completed in one day without being a distraction to golfers. Irrigation auditing is done throughout the entire day when the team can visually see and evaluate operation of the system at full capacity. Leaching of salts which requires sprinkler heads to run for several hours on the greens, or other areas, can happen during the closure day. A few examples of projects that will be noticed by Members in the upcoming weeks because of the Tuesday / Wednesday closures... sodding areas that did not TRANSITION well, bunker repair work and repositioning of sand, repairs of entry / exits of bunkers. All these projects can be completed more quickly when there is not the need to work around golf play. So... thank you for Tuesday, Wednesday closures

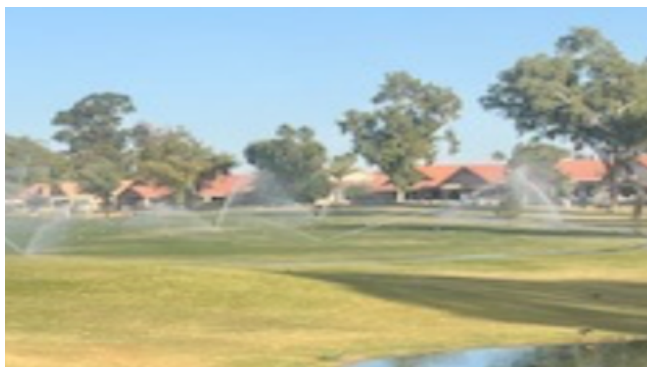

Transition Time

Every year during the spring, the golf course TRANSITIONS back to bermudagrass from winter ryegrass. This is NEVER easy. And.... it changes every year because of the dependency of weather and Mother Nature. Every Club manages this process differently depending on their financial impacts and demands of play. As you can imagine, those do not always line up with what is best agronomically. Removing ryegrass throughout the months of April and May give the facility the best advantage for bermudagrass recovery in June and July. Starting the TRANSITION process early leads to it being completed earlier, which results in a healthier stand of bermudagrass by October. There are several agronomic decisions necessary to have a successful TRANSITION.... and... making all the right decisions does not guarantee success. One of the more important, beneficial decisions, is to lower the height of cut (HOC) on the ryegrass.

I understand this causes heart-burn' for some golfers, but it is a vital step in the TRANSITION process.

Lowering the HOC reduces the ryegrass turf canopy that is covering the underlying bermudagrass. Reducing the HOC shifts the competitive advantage for sunlight, water, and nutrients to the benefit of the bermudagrass. During the months of May and June, the temperatures start getting warmer during the day which triggers the bermudagrass to 'wake-up.' However, the low nighttime temperatures and low humidity, slow the growth of the waking bermudagrass. Lowering the HOC, along with other agronomic practices such as, increasing irrigation and increasing granular fert applications, help to remove the ryegrass, and 'push' the bermudagrass so the golf courses will be in the best state of preparation. When Mother Nature brings summer monsoons, high humidity, and warm nighttime temperatures above 85 degrees, the uninhibited bermudagrass begins to grow at a rapid pace and starts to fill-in. As I mentioned earlier, Mother Nature always has the final say. At this point, I am extremely happy with where the golf courses are at in the TRANSITION process. I, and the team, had tremendous concerns after the extremely dry spring and the record breaking heat in March. Some areas are better than prior years and some areas that are not as good, which is typical. As we move into July, things will continue to improve dramatically in overall playing conditions. If rainfall is received at typical amounts for July and August we should have a particularly good stand of bermudagrass by the end of summer to Overseed into.

Aeration Season

During the summer months of June, July, and August the team works through its agronomic plan of aeration.... Fairways, tees, greens, collars. The tee complexes are done initially in June and sanded. The fairways are done 3x... once a month in June, July, August. The Green-collars are completed in July.

The goal of aeration is to remove organic matter and introduce new material into the profile. Obviously, the putting surfaces demand the most attention due to their importance and priority of playability. Our goal is to remove 20-25% of the greens surface every year with the bulk of it being in July.

Course & Community: A Friendly Reminder for Cart Drivers

See how you can help keep our community safe and neighbor-friendly

As many of us enjoy the convenience of traveling by golf cart, we kindly ask for your cooperation in keeping our community safe and neighbor-friendly. Whether you're heading to the first tee or navigating residential streets, please keep the following in mind:

Respect the "Rough": Be mindful of homeowners' property, private yards, and community landscaping. A small detour can cause lasting damage to delicate turf and plants.

Paws & Peace: Many of our residents have pets near the paths. Maintaining a safe, steady speed helps keep our furry neighbors calm and everyone safe.

Smart Parking: When stopping near homes or common areas, please ensure you are in a designated spot and not blocking access or encroaching on private lots.

Stay on Track: Stick to designated

paths to protect our shared spaces and maintain the tranquility of our neighborhoods.

A little extra awareness goes a long way in ensuring our community remains a beautiful and peaceful place to live and play.

Thank you for your courtesy!

Get a Grip: Why Fresh Grips Matter for Your Game

In the world of golf, your hands are your only connection to the club. Over time, heat, dirt, and oils from your skin cause grips to oxidize and harden, leading to a loss of traction and performance. If your clubs are feeling slick or showing visible wear, it's time for a refresh.

The Benefits of Re-Gripping:

Improved Control: Fresh, tacky grips allow you to hold the club with less tension. This promotes a smoother swing tempo and prevents the club from twisting at impact.

Increased Distance: When you aren't worried about the club slipping, you can achieve better

clubhead speed and more consistent ball striking.

Reduced Hand Fatigue: New grips provide better shock absorption, which is easier on your joints—especially during those long practice sessions on the range.

Weather Readiness: High-quality modern grips are designed to maintain traction even in the humid Arizona heat, ensuring your "big stick" stays secure in your hands.

Pro Shop Service

Don't let a worn-out grip cost you strokes on the scorecard. Whether you need to refresh your entire set

or just want to stabilize your stroke with a new putter grip, we are here to help.

Visit either the Cottonwood or Palo Verde Pro Shops today! Our professional staff offers expert re-gripping services for all clubs, including putters, to get your gear back in championship form.

Problem on the Golf Course? Who Do I Call?

ADDITIONAL LEVEL OF SECURITY IN COTTONWOOD/PALO VERDE

With the full support of HOA #2, the Sun Lakes Rangers will continue to provide safety patrols in the Cottonwood and Palo Verde communities. Both the Patrol and the Rangers share the goal to provide an effective and efficient Safety Patrol service to our residents and guests. The Patrol and Rangers remain in constant radio contact should an event occur involving law enforcement and are available to back each up if necessary.
