MCP GOV: AI SOLUTIONS FOR HIGH-SECURITY ORGANIZATIONS

The Dell Pro Max with GB10: Your Private Intelligence Hub

The Dell GB10 is a plug-and-play AI powerhouse designed to turn months of manual data analysis into seconds of actionable insight. It is built for government professionals who need immediate results without the need for a technical or coding background.

WOMAN-OWNED. MISSION READY. GOVERNMENT APPROVED.

- High performance computing
- AI ready performance
- Compact design
- Scalability
- Local data processing
- User friendly interface

THE MAGIC OF GB10

ZERO AI TECH-HURDLES

- If you can plug in a device or send a text, you can leverage the GB 10.
- Designed for seamless integration into your existing IT framework with no specialized training required.

ON-PREMISE ADVANTAGE

- Securely search through your private, non-shared files alongside your organization's shared documents.
- The system connects disparate data points to find the "needle in the haystack" instantly.

REDUCE TIME WITH AI AUTOMATION

- Automatically filter through unstructured documents (PDFs, emails, notes) to generate a cohesive view.
- Tasks that normally take weeks of manual analysis are completed in seconds.

SIMPLE INSTRUCTIONS

- No complex search queries or "computer speak" required.
- Use natural, conversational English—spoken or typed—to "talk" to your data and refine results an infinite number of times.
