

## NOW OFFERING TELEPSYCHIATRY EVALUATIONS

We are excited to share that the MC3 program is now offering in-home, video-based patient evaluations as a follow-up to same-day phone consultations statewide to all MC3-enrolled providers. As an enhanced service component, MC3 is offering a one-time patient psychiatric evaluation of the patient, with recommendations to the primary care provider for ongoing care. This opportunity is limited to patients with insurance that is accepted by the Michigan Medicine Department of Psychiatry. Following the evaluation, your local Behavioral Health Consultant will follow-up with your patient to provide local resources based on the recommendations provided by the consulting psychiatrist.

### Important information:

---

**One-time video consultation with the patient in their home**

**Treatment will remain with the prescriber/treater (PCP)**

**Based on insurance accepted by Michigan Medicine Department of Psychiatry**

### How do I refer patients?

---

Call your [regional number](#) to initiate a same-day phone consultation to review the patient with the consulting psychiatrist. If it is decided that a Telepsychiatry Evaluation is the best next step, then your local Behavioral Health Consultant will help you coordinate the Telepsychiatry referral.
