

WHAT

Web-based, tele-mentoring training that combines a brief didactic presentation with interactive case-based presentations.

Project ECHO® (Extension for Community Health Outcomes) leverages video conference technology to connect subject matter experts with primary care teams in local communities, fostering an “all teach, all learn” approach. Learn more on our website:

[MC3 ECHO: Behavioral Health](#)

- There is no fee to attend this activity

ECHO Project Coordinator

LEARNING OBJECTIVES

- Recognize and diagnose mental and behavioral health symptoms and disorders in their patients.
- Utilize evidence-based treatment including therapy and prescribing psychiatric medications for patients experiencing mental and behavioral health symptoms.
- Provide case consultation and peer mentorship to enhance the learning and understanding of behavioral health conditions as they are experienced by children and families in Michigan.

EXPECTED RESULTS

After completing this activity participants will be able to determine the mental health needs of their patients and offer the appropriate evidence based treatment to their patients.
