

## IMPROVING MENTAL HEALTH ACCESS FOR WOMEN AND CHILDRENConsultation • Education • Resources

There is a mental health crisis in the state of Michigan and there are not enough psychiatrists to go around.

Established in 2012, the MC3 program offers psychiatry support, resources, and education to primary care providers in Michigan who are treating pediatric and perinatal patients with behavioral health problems.

## **By the Numbers** 95% Providing critical psychiatry support in of providers agreed that Michigan since psychiatric consultation reduced immediate need for higher level of patient care Primary Care Providers Enrolled Increased Provider Confidence Consultations Training Providers report increased Providers report increased confidence in diagnosing the confidence in treating most common behavioral adolescents after the training "Youth Suicide conditions: Clinics in Michigan Prevention in the Primary ADHD Care Setting": Anxiety **Risk assessment** Depression Safety planning 42,000+ **Patient Consultations** Services Provided 40% 65% 23% of patients had of perinatal women of children and moderate to severe have experienced adolescents have 4,60 symptoms trauma experienced suicidal thoughts Providers Educated

## Perinatal Patient Symptoms\*

reduction in clinical depression and anxiety for patients in their first month of services

\*Perinatal Patient Care service only available in select counties

"Instead of delaying care I feel able to immediately make a step in the right

direction for the patient, and deliver

quality care, a prescription and the

-MC3-Enrolled Provider

correct referrals, right away."

MC3 is administered by Michigan Medicine and funded by the Michigan Department of Health and Human Services (MDHHS) via general funds, Medicaid Administration funds, Health Resources Services Administration (HRSA) funds and Flint Water Crisis funds.
