

PCIHIPAA™

A Complete Compliance Program for IndependENT Dental Solutions Clients

PCIHIPAA™

Who Is PCIHIPAA?

"PCIHIPAA is a nationally recognized healthcare compliance company providing thousands of private practices across the country with solutions for HIPAA, OSHA and Payments Compliance. With our award winning OfficeSafe 360 platform, practices are able to manage compliance with an all-in-one platform while also securing a best-in-class Cyber Breach Liability Program. We are endorsed by the Arizona State Physicians Association, Alabama Medical Association, and numerous medical/dental Societies across the country."

It is a program that IndependDENT Dental Solutions feels is critical for their clients.

Frequently Asked Questions (FAQs)

Why Should I Complete A Risk Assessment?

The HIPAA Security Rule requires that covered entities and its business associates conduct a Risk Assessment of their healthcare organization (Section 164.308(A)(1)(II)(A)). The next HIPAA requirement is for the practice to review, understand, and correct any vulnerabilities or deficiencies uncovered by the Risk Assessment.

Why is it Critical for the Doctor to Attend the Risk Review Meeting?

If there is an audit or data breach the Doctor's assets and professional reputation are at risk. Ensuring the Doctor completely understands the risk assessment results is critical and a necessary next step.

What Are The Common Risks And Misconceptions?

Most practices have a false sense of security. Cyber-attacks are up over 300% over the past year. Data breaches, ransomware attacks, and human error are now common, daily occurrences. Based on our experience, it is critical to be proactive and not reactive in order to recover from a catastrophe patient data event.

Is There a Cost?

The risk assessment and review are complimentary. After the meeting we will send you a 23-page HIPAA Risk Report for your files. The Risk Assessment Review is mandatory and fulfills the requirement under the HIPAA Security Rule. This is the first document the Office for Civil Rights will ask for if you are ever audited. It is critical you have this document on file.

What Can I Expect During the Risk Review Meeting?

The meeting will be 20-30 minutes. The primary objectives of the meeting are to:

1. Help you understand HIPAA requirements
2. Review the results of your Risk Assessment
3. Explain key vulnerabilities we uncovered
4. Discuss solutions to mitigate your risks

Our goal is for you to leave the meeting with a clear understanding of the HIPAA laws and how to correct any vulnerabilities.

Documents and Policies

You are required by law to create and maintain copies of these documents on file in your office. As a best practice, you should review and update these documents on an annual basis to ensure that your documentation is up to date.

Search Documents:

Policies

☐ Select All (Unselect 0)

PRINT SELECTED (0)

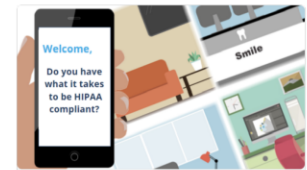

☐ Acceptable Use Policy

Policy that defines acceptable and unacceptable use of electronic devices and network resources in conjunction with its established culture of ethical and lawful behavior, openness, trust, and integrity.

☐ Business Associates Policy

Policy that describes the obligations of business associates and the requirements for contracting with business associates.

HIPAA Training

HIPAA Officer Certification

This self-paced training is divided into four (4) modules based on the HIPAA, Privacy, Security, and Breach Notification Rules. You must successfully complete all four levels of challenges to obtain your notification and 7 DATE

OSHA Self Inspection

This checklist is not all inclusive. It is a guideline for how prepared your practice is to meet OSHA requirements. All of these areas are required, so any deficiencies must be corrected as soon as possible.

Bloodborne Pathogens

Healthcare workers may be exposed to blood and other potentially infectious materials (OPIM) due to their job responsibilities. Potential exposure can occur to any employee, not just those involved directly in patient care. Bloodborne Pathogens training is a critical component of keeping healthcare employees safe in the workplace. OSHA mandates that all employees who could be at risk of exposure be trained annually and whenever their job responsibilities change in such a way that exposure could occur.

- ☐ The Bloodborne Pathogen Standard is available for all employees to review.
- ☐ All new employees at risk of bloodborne pathogen exposure are trained.
- ☐ All employees receive annual bloodborne pathogen training.
- ☐ Employees know how to handle an exposure incident.
- ☐ Food and beverage are not stored or consumed in areas with risk of contamination.

"To join PCIHIPAA 3 years ago was one of the best business decisions I have made in my 30 years of practicing medicine. Recently, I fell victim to a ransomware attack. If it was not for PCIHIPAA and the cyber security they offer I would have been on the verge of bankruptcy."
