

Summer Construction Plans

Parish Pastoral Council has approved several projects to be completed over the summer.

They include:

- New School Entrance
- Renovations to the Boys Restroom in the Undercroft
- Preschool Bathroom

The estimated cost of these projects is \$275,000. The funds for the construction comes from the Capital Maintenance Account, not operating funds. The Capital Maintenance Account is funded through donations made strictly to capital maintenance projects, insurance claims (ie. awning damage), interest, and designated capital reserves.

New School Entrance

The old awning that marked the front entrance of the school was destroyed in a storm in 2014; since then, discussions have taken place about what structure should take its place. The new construction will begin June 12th.

Undercroft Boys Restroom

The Capital Maintenance Account will cover the cost of renovations to the boys restroom in the undercroft, where two urinals are not functioning and the piping has disintegrated and collapsed. The bathroom construction will begin June 2nd.

New Preschool Bathroom

Guardian Angels School is expanding its preschool program to include a full-day offering for the 2018-2019 school year. The Capital Maintenance Account will be used to build a bathroom in the hallway of the school that houses the preschool classrooms, eliminating the need to walk our youngest students through the school to the closest restroom.

Donor Funded Projects

The **Concession Area in the undercroft** will be renovated thanks to funds raised from the 125th Anniversary Celebration along with a donation from Angel Follies; Angel Follies graciously designated a portion of their proceeds for the 2018 performances to adding built-in appliances to this space.

Our preschoolers, by state mandate, also need a separate play area than our older school children. We have been blessed with donors who support the building of a **Preschool Playground**. We thank the Sohngen family who donated all of the playground equipment in memory of Bill and Dorothy Sohngen and A&A Safety who did all of the site prep, fencing and mulch.

There will be limited access to the building while construction work is in progress. There will be no parking in the pit area beginning June 2nd to allow room for unloading equipment and supplies. The areas/school will be closed for the month of July.
