

Sciton BBL Heroic™ Skin Rejuvenation

BBL Heroic™ delivers broad-band light energy to gently heat the upper layers of the skin. The heat absorbed by the targeted areas will stimulate the skin cells to regenerate.

Treats the following conditions:

- Reduces hyperpigmentation: age/sun spots, freckles, benign pigmented lesions & dyschromia (light or dark patches on the skin)
- Minimizes redness: vascular lesions, rosacea, cherry angiomas, and telangiectasias

Ideal Areas Treated:

- Face
- Neck
- Chest
- Hands
- Can also be used on larger body areas such as arms, legs and back

For optimal results, 3 treatments are recommended at intervals of 4 weeks.

Plan treatments accordingly as skin could take up to 2 weeks to heal.

- Localized redness and swelling may be present and typically resolves within 24 to 72 hours.
- Treated lentigines (brown spots) usually darken slowly over the next 24 to 72 hours. Epidermal melanin will darken and may leave a "coffee-ground" appearance. This usually exfoliates in an average of 7-14 days.
- With any laser treatment, it is best to avoid sun exposure two weeks prior to treatment, during the course of treatment and after treatment's are complete. Unprotected sun exposure may or may not have contributed to your condition, but it can certainly affect your results. Remember, all natural light causes sun damage and UVA is present all day long, through window glass and clouds.
