Exovex Revive Exosomes Serum **\$250/Vial**

Exosomes are a rich mixture of precision growth factors, peptides, cytokines, and mRNA that target damaged skin by providing the nutrients and resources necessary to facilitate the repair of cells.

This powerful serum is designed to be applied topically in conjunction with micro-needling, and energy based aesthetic devices. This application accelerates recovery time and enhances treatment results by working synergistically to improve the appearance of tone, texture, and fine lines.

After age 18, we lose 1% of collagen every year due to our skin cells losing efficiency to make growth factors. Growth factors are naturally occurring proteins that stimulate cell growth and healing. Aesthetically, growth factors play an important role in repairing skin cell damage, and maintaining skin firmness, tone, and elasticity. Exovex Revive Exosome Serum can help fill in the growth factor gap when used in conjunction with micro-needling, and energy based aesthetic devices.

Exovex Product Specifications:

- Exovex is a placental MSC stem cell-derived exosomes product containing isolated and concentrated exosomes suspended in 0.9% saline.
- Each Exovex lot is tested for sterility as per and endotoxin as per, and sterile filtered through 0.22µm (micron) pore membrane filtration.
- Exovex stem cells are procured from young, healthy donors who have been tested negative for communicable diseases, such as HIV I/II, Hepatitis B, Hepatitis C, HTLV I/ II, Syphilis, CMV, West Nile Virus, Zika virus, and screened for other pathogens.
- Exovex exosomes are characterized quantitatively via Nanoparticle Tracking Analysis and Next Generation Sequencing for a full analysis of particle size and concentration, all RNA species and all functional components present, providing the most comprehensive evaluation of safety and efficacy available anywhere in the world.
- Exovex exosomes are qualitatively characterized for hundreds of growth factors and anti-inflammatory proteins, including BMP-5, GDF-15, OPG, SCF, TGFβ3, VEGF, IL-1ra, IL-6, IL-10, MCP-1, MIP-1b, PDGF-BB, TIMP-1, TIMP-2, TNF RI, and more.
- Exovex is acellular, preservative-free, and manufactured with xenofree products in a cGMP facility. Manufactured in the USA with USA-sourced tissue.
- For topical use only
