Millspace Youth Theatre Workshop

Millspace is offering a one-day youth theater workshop on Sunday, April 27th, for children ages 9 to 14. The workshop, led by local actor and theater educator Katherine Cusack, will include improv, games, and the creation of new performance pieces. Participants will learn performance and improv techniques in a fun, low-pressure environment, and the day will conclude with a short improv showcase. The workshop will take place from 9:00 AM to 3:00 PM, with the showcase beginning at 2:30 PM at Newmarket Millspace, 55 Main St, Suite 132, Newmarket, NH 03857.

Protect our Waters: Scoop the Poop!

Did you know that pet waste is a significant source of pollution in our local waters, including the Lamprey River? With so many dogs in Newmarket, the amount of pet waste generated daily is substantial.
Leaving pet waste behind is not just unsightly; it's a health hazard. It can contain harmful bacteria and parasites like Giardia and Salmonella, which can contaminate our environment and potentially sicken people and other pets. Rain washes this waste from our yards, parks, and trails into storm drains, eventually leading to our rivers and streams – the very places we swim, fish, and enjoy.

You can help keep our community and waters clean by following these 3 simple steps:

1. **SCOOP IT:** Always carry a bag when walking your dog.
2. **BAG IT:** Securely place the waste in the bag.
3. **TRASH IT:** Dispose of the bagged waste in a designated trash receptacle.

Remember, it's the law! Newmarket's local ordinance (Newmarket Code of Ordinances, Chapter 4, Article II, Section 4-29) requires that all pet waste be picked up and properly disposed of.
By making this small effort, we can collectively make a big difference in protecting the health of our community and our precious local waters.
This important message is brought to you by the Town of Newmarket, in partnership with the Piscataqua Region Estuaries Partnership (PREP) Every Drop campaign, to help meet US Environmental Protection Agency (EPA) requirements for sharing pollution prevention information
