

The NCCP only applies to [NREMT recertification](#). KBEMS has decided to let the EMS provider's primary EMS service determine the 10 hours of Local Continued Competency Requirements (LCCR). If these hours are not specified, the provider may use any additional state or CECBEMS-approved EMS-related education towards these requirements. KBEMS decided to adopt the NCCP prior to the March 31, 2019 deadline in order for Kentucky NREMT certified providers to take advantage of the NCCP program renewal benefits.

Kentucky EMS provider recertification/licensure is not affected by this action. KBEMS provider renewal requirements can be found on the KBEMS website under the heading [certification & licensure](#).
