

Math+: Advanced Mathematics Learning Opportunity

Gain an edge – with skills that matter

This is Mr. Greg Owsley, co-founder and curriculum writer of RedwoodPrep. I've taught at Rockhurst High School for the last 16 years, most recently serving as STEAM Director. I will be teaching another addition of Math+ this Fall for 6th to 8th grade students.

I strongly believe in Math+ and would encourage your family to participate. Each Math+ course explores 1 major idea included in Stanford University's introductory math sequence. This is world-class content tailored to younger students. I continue to be impressed by how students get excited and passionate about math during Math+. We want students to be excited about math – and Math+ does a great job doing just that.

This season's course will be taught at Rockhurst High School on Tuesdays from 4:00 to 5:00 pm starting on Tuesday, October 22 for six weeks. The program will cost \$250. Families can sign-up at www.RedwoodPrep.com.

This Fall's course focuses on Geometry. Geometry focuses on questions of shape, size, space and relative position. The concept has clear practical applications, represents a critical standardized test topic, and forms the basis for most engineering disciplines.

Most interested students can succeed in Math+. I find that students with a gift for math or a real desire to participate can succeed and learn a lot. Students interested in advanced math classes, high performance on standardized exams or general math ability will particularly benefit.

If you have any questions, please reach out. I hope to work with you and your family on this exciting program.

Best,

Mr. Greg Owsley
