To whom it may concern:

**Endorsement of the San Francisco Sailing Science Center**

We the undersigned have been briefed on the exciting new Sailing Science Center and fully support its vision to create a new, interactive science museum framed around sailing. We further understand that the target location for the museum is on Treasure Island in the historic building known as Hangar 3. We believe the proposed museum:

- Can become a major asset to the city of San Francisco and the Bay Area at large
- Fits well with the nautical heritage and innovative character the Bay Area
- Is well-conceived and can add significant value to our community
- Can be well-positioned for visitor access by both tourists and residents, and has good prospects for reaching its traffic projections
- Combines things that everyone will be able to enjoy and can benefit from
- Is generating strong support within the community, even now in its early stages
- Is led by a professional, creative and capable team with good character and motivated for the public good
- Has identified an important mission and has a high likelihood of success

In short, we endorse the organization and its vision, and recommend its support by potential donors, sponsors and government entities.

Sincerely,

**Endorsement of the San Francisco Sailing Science Center**
