

Transition to Adult Healthcare Training for Parents & Youth/Young Adults

Is your child 14 or older? If so, this might be the training for you and your child. P2P is presenting 4 trainings across the state for both parents and youth (there will be a youth trainer too!) on Transition to Adult Healthcare.

In this training, you will learn about the importance of having a plan for managing one's own health related tasks (such as taking medication, calling in refills, making doctors' appointments), ensuring continuity of care, legal issues, timelines and more..... Parents, caregivers, teens and young adults are all invited. You might also be eligible to receive a \$25 stipend for attending.
