

2026 Quality Blue Condition Assessment Program

As a reminder, our Quality Blue – Condition Assessment Program (QB-CAP) is back this year to help and encourage annual wellness visits for our members — your patients. Wellness visits are one of the best ways to spot developing conditions, and to stay on top of ongoing chronic ones. They provide opportunities to assess health and potentially identify problems early. QB-CAP eliminates the use of paper forms and simplifies incentives for annual wellness visits.

Through QB-CAP, network primary care providers (PCPs) treating Blue Advantage members can earn additional payments for completing annual wellness visits and accurately and comprehensively assessing their conditions.

2026 QB-CAP Payment Opportunities

- \$60 payment per completed Annual Wellness Visit with a Blue Advantage member.
- \$40 payment per completed condition assessment (positive or negative) for Blue Advantage members.

Louisiana Blue will host webinars in the coming months for you to learn more. These webinars will include an overview of QB-CAP, plus education on the program, and the Medicare Advantage P4P Stars Incentives. If you have questions, please reach out to ValueProgramRepresentatives@lablue.com. We also have a provider tip sheet, available [here](#).

Registration links are available in the “Events” section of our Provider Weekly Digests approximately one month prior to a webinar. These digests are sent to each provider’s correspondence email address. If the correspondence information on your provider record needs updating, use our Individual/Group Provider Update Request Form or Facility Update Request Form to make updates. These forms are available at www.lablue.com/providers, click “Resources,” then “Forms.”
