

The Air Pollution Control Division (Division) is holding the first of several public meetings to engage stakeholders on potential revisions to the Air Quality Control Commission's Regulations Number 3 and 7, addressing ozone, greenhouse gas (GHG) and more. Note that this is the Division's first step of many to come in addressing recent legislation in Colorado.

The Division will identify the goals behind a potential rulemaking, identify timing, and then share an overview of potential rule revisions and emission reduction strategies relating to:

- Early permitting of oil and gas exploration and production facilities
- State Implementation Plan (SIP) reasonably available control technologies (RACT) requirements for major sources (those having a permit to emit 50 tons per year or more) of VOC and/or NO<sub>x</sub> in the Denver Metro/North Front Range
- SIP streamlining revisions
- Recent revisions to Colorado Revised Statute (CRS) Section 24-7-109 (SB 19-181 concerning emissions control for oil and gas operations)

### **Meeting**

Date: July 29, 2019

Time: 2:00 to 7:00 P.M.

Location: CDPHE, Sabin and Cleere rooms  
4300 Cherry Creek Drive South  
Denver, Colorado 80246

Each person interested in attending and/or providing public comment is requested to register in advance, as space is limited to 120 persons.
