

# Join The Henry Ford's inHub Learning Community

Become a part of our expanding learning community, consisting of more than 8,000 members who share a common vision: inspiring innovation, fostering invention and nurturing creativity, all aimed at narrowing the innovation opportunity gap and helping to shape a better future.

Research shows that exposure to innovation increases the chances that children become innovators, inventors and creators. inHub elevates The Henry Ford's collections, stories and expertise of past and present innovators, along with our partners in innovation education, through:

- A transdisciplinary, social-emotional learning framework called **Model i** that's designed to inspire learners to unleash their innovative, creative and inventive potential.
- A **curriculum resource library** full of lesson plans, resource guides and other digital learning media that educators can use in their classroom or while visiting The Henry Ford.
- Online self-paced, hybrid and in-person **professional development and certification opportunities** that support educators looking to integrate innovative learning practices like culturally responsive teaching, place-based learning, invention education and more in their classrooms.
- **Informal learning programs and field trips** like a literacy-focused, play-based early childhood program and summer camp experiences for school groups, youth and families.
- An invention education program called **Invention Convention Worldwide**, a global K-12 program that activates STEM, invention and entrepreneurship to instill problem identification, problem solving and creativity skills for life.
