

Spring 2021 | Issue 1

PRESIDENT'S MESSAGE

We are excited to welcome you to our first-ever, e-newsletter entitled the “WestLAND Wire” that aims at serving those in the A/E/C industry with trending and informative articles on a quarterly basis. We appreciate and value the connections we have with each of you and have put you on our current e-mailing list. If you ever want to unsubscribe, it is very easy to do so at any time (please see link in the footer below). Additionally, you may have a coworker or peer in the industry who may benefit from the information in our e-newsletter, so please feel free to encourage them to subscribe to our newsletter.

Celebrating over 20 years in service, WestLAND Group, Inc. (WLG) is a WBE-certified, award-winning firm with over 125 professionals providing civil engineering, geospatial (surveying/mapping/GIS), and land planning services to private and public companies including developers, utility agencies, energy providers, cities and counties, and water districts/companies. The firm has been growing exponentially while we navigate through these unique times. The firm has office locations in Ontario, Valencia, and Bakersfield, CA with additional emerging satellite offices in San Diego, CA and Las Vegas, NV.

In this first issue, we are focusing on geospatial laser scanning, light detection and ranging (LiDAR), and unmanned aerial vehicles/systems (UAV/UAS) technology and how clients and projects can benefit utilizing these resources. Some of the highlights throughout this edition include background information on the technology, general uses, benefits, and samples of projects/case studies where we have applied those uses. We hope you enjoy this edition and welcome any feedback as we strive to be your expert team of choice.

Mary Josenhans

CEO/President
