

# *Spend an Evening Under the Stars*

*Join Bruce Zeller, the planetarium director, as he explores the beautiful stars and constellations of the evening sky. Clearly visible in the winter sky are the constellations Orion the Hunter, Taurus the Bull and the Hunting Dogs. In the early morning sky the planets Venus and Mars can be spotted rising in the east. Of the 88 constellations, only 12 are zodiacal or signs of the zodiac. Come to the planetarium for an explanation of why that is.*

**Date: Monday, January 31, 2022**

**Place: New Rochelle High School Planetarium**
