

Spend an Evening Under the Stars

The predawn sky has 4 naked eye planets: Venus, Jupiter, Mars and Saturn lined up from left to right in the southeast sky. You have to look early as the Sun rises earlier and earlier.

The planetarium will take you on a journey of the solar system as we watch ***Oasis in Space***, using our Spitz Scidome projectors.

"Once more, we are ready to take the audience on a rich and fascinating journey through our celestial neighborhood, as we look for one of organic life's key ingredients - liquid water" (Spitz, Inc.)

Date: Thursday, May 26, 2022

Place: New Rochelle High School Planetarium
