

**Meeting of the Minds: “Einstein's Cat” presented by Doug Halsey – Wednesday, May 18 at 1pm by Zoom**

Join us for a brief history of telegraphy and its local relevance. By the late nineteenth century, the telegraph was essential to communication and commerce, similar to the internet today. Ambitious people created the opportunity for the telegraph to arrive here in the PNW in 1866, in time to serve the needs of the American and British forces jointly occupying the San Juans.

A licensed ham radio operator, Doug is interested in Morse code and telegraphy and worked as a Ranger with the National Park Service from 1998-2020. Doug served at San Juan as a historical interpretation ranger and historic weapons safety officer.

To find out the relevance of Einstein's Cat, attend Doug's presentation, on Wednesday, May 18 at 1pm. To attend, access the Zoom link on the Calendar of Events page at [orcasseniors.org](http://orcasseniors.org). All are welcome to attend.
