

## Orcas and Echolocation

---

Imagine that you are a young orca living with your family in the sea. Beneath the surface of the water, it's very hard to see in the darkness. How do you find your way? How do you stay close to your family as you travel together? How do you find fish to eat? Since you are an orca, you have a special ability called echolocation that helps you "see" with sound! Please join Dr. Sally Hodson on [\*\*Thursday July 22<sup>nd</sup> at the library from 1-3 pm\*\*](#) as she reads her book, *Granny's Clan: A Tail of Wild Orcas*, with a follow-up orca echolocation activity for children. This program is free and open to the public, children and adults alike.

## LEARN ABOUT GREEN BOATING!

Ever wondered what eelgrass is and why it's important? Join us [\*\*Thursday July 22<sup>nd</sup> at the library from 6pm\*\*](#) at the library (and by Zoom!) to learn about [Friends of the San Juans' "Anchor Out"](#) program and what boaters can do to help protect this critical habitat for salmon and orca. They will also be presenting other green boating practices including boating around whales, marina resources and other info for boating in the San Juans this summer. Join us for this fun and informative meeting!
